$$a^2 - b^2 = (a + b)(a - b)$$

$$a^3 + b^3 = (a + b)(a^2 - ab + b^2)$$

$$a^3 - b^3 = (a - b)(a^2 + ab + b^2)$$

$$(a^2 + 2ab + b^2) = (a + b)^2$$

$$(a^2 - 2ab + b^2) = (a - b)^2$$

$$(a^3 + 3a^2b + 3ab^2 + b^3) = (a + b)^3$$

$$(a^3 - 3a^2b + 3ab^2 - b^3) = (a - b)^3$$

$$a^2 + b^2 + c^2 + 2ab + 2bc + 2ca = (a + b + c)^2$$

*Teaching Mathematics at a Technical College* Zachary Youmans, 2022-11-25 Not much has been written about technical colleges especially teaching mathematics at one Much had been written about community college mathematics This book addresses this disparity Mathematics is a beautiful subject worthy to be taught at the technical college level The author sheds light on technical colleges and their importance in the higher education system Technical colleges area more affordable for students and provide many career opportunities These careers are becoming or have become as lucrative as careers requiring a four year degree The interest in technical college education is likely to continue to grow Mathematics like all other classes is a subject that needs time energy and dedication to learn For an instructor it takes many years of hard work and dedication just to be able to teach the subject Students should not be expected to learn the mathematics overnight

As instructors we need to be open honest and put forth our very best to our students so that they can see that they are able to succeed in whatever is placed in front of them This book hopes to encourage such an effort A notable percentage of students who are receiving associate degrees will go through at least one of more mathematics courses These students should not be forgotten about their needs are similar to any student who is required to take a mathematics course to earn a degree This book offers insight into teaching mathematics at a technical college It is also a source for students to turn toward when they are feeling dread in taking a mathematics course Mathematics instructors want to help students succeed If they put forth their best effort and us ours we can all work as one team to get the student through the course and onto chasing their dreams Though this book focuses on teaching mathematics some chapters expand to focus on teaching in general The overall hope is the reader will be inspired by the great work that is happening at technical colleges all around the country Technical college can be should be and is the backbone of the American working class

**Algebra Teaching around the World** Frederick K.S. Leung,Kyungmee Park,Derek Holton,David Clarke,2014-10-13 Utilizing the LPS dataset Algebra Teaching around the World documents eighth grade algebra teaching across a variety of countries that differ geographically and culturally Different issues in algebra teaching are reported and different theories are used to characterize algebra lessons or to compare algebra teaching in different countries Many commonalities in algebra teaching around the world are identified but there are also striking and deep rooted differences The different ways algebra was taught in different countries point to how algebra teaching may be embedded in the culture and the general traditions of mathematics education of the countries concerned In particular a comparison is made between algebra lessons in the Confucian Heritage Culture CHC countries and Western countries It seems that a common emphasis of algebra teaching in CHC countries is the linkage or coherence of mathematics concepts both within an algebraic topic and between topics On the other hand contemporary algebra teaching in many Western school systems places increasing emphasis on the use of algebra in mathematical modeling in real world contexts and in the instructional use of metaphors where meaning construction is assisted by invoking contexts outside the domain of algebraic manipulation with the intention to helping students to form connections between algebra and other aspects of their experience Algebra Teaching around the World should be of value to researchers with a focus on algebra pedagogy or international comparisons of education Because of the pedagogical variations noted here there is a great deal of material that will be of interest to both teachers and teacher educators
