

## A vibrant, abstract collage featuring a man and a woman, a large clock, a calculator, a train, a car, and various geometric shapes and patterns in a bold, graphic style. The composition is dense and layered, with a color palette dominated by bright primary and secondary colors. The man is depicted in the upper left, smiling, while the woman is in the center, looking down. A large, stylized clock face is prominent in the lower left, and a calculator is in the upper left. A train is visible in the upper right, and a car is in the lower right. The background is filled with various geometric shapes, patterns, and text elements, creating a complex and visually stimulating scene.

web heating and cooling curves are graphs they plot a substance s temperature y axis against heat x axis for heating curves we start with a solid and add heat energy for cooling curves we start with the gas phase and remove heat energy cooling and heating curves have five segments let s study each one by looking at heating ice to

web for water this temperature is 100 c because the boiling point for water is 100 c different substances have different melting points and boiling points but the shapes of their heating curves are very similar for example this is the heating curve for iron a metal that melts at 1538 c and boils at 2861 c cooling curves
