Handbook of Human Factors in Air Transportation Systems Steven James Landry, 2017-11-22. One of the primary applications of human factors engineering is in the aviation domain and the importance of human factors has never been greater as U.S. and European authorities seek to modernize the air transportation system through the introduction of advanced automation. This handbook provides regulators practitioners researchers and educators a comprehensive resource for understanding and applying human factors to air transportation. *Aircraft & Aerospace*, 1992.

Open Skies for Africa Charles E Schlumberger, 2010-06-23. In Africa where poor roads ports and railways often constrain efficient transportation air transport holds great potential as a lever for economic growth and development. Yet Africa has suffered several decades of inefficient air services. Uncompetitive flag carriers set up by newly independent African states offered primarily intercontinental flights while the domestic air service market remained underdeveloped and underserved. The 1999 pan African treaty on liberalization of access to air transport markets the Yamoussoukro Decision attempted to address these shortcomings. Yet a decade later only partial liberalization has been achieved. Open Skies for Africa: Implementing the Yamoussoukro Decision reviews progress made in carrying out the treaty and suggests ways in which the liberalization process can be encouraged. The book analyzes the completed and still pending steps toward implementation of the Yamoussoukro Decision both on a pan African level and within various regions. Special focus is given to the challenges posed by the poor aviation safety and security standards that exist in most African countries. Finally the book measures the impact that certain policy steps of the Yamoussoukro Decision have had and evaluates the economic significance of air transportation and its full liberalization in Africa. The book concludes that the process of liberalizing African air services must continue and provides policy recommendations for the way forward. **Scientific and Technical Aerospace Reports**, 1992.
