Faire Face Au Cancer:

Vaincre par la sophrologie Raymond Abrezol, 2007

Anthropologies of Cancer in Transnational Worlds Holly F. Mathews, Nancy J. Burke, Eirini Kampriani, 2015-06-26 Cancer is a transnational condition involving the unprecedented flow of health information technologies and people across national borders. Such movement raises questions about the nature of therapeutic citizenship: how and where structurally vulnerable populations obtain care and the political geography of blame associated with this disease. This volume brings together cutting edge anthropological research carried out across North and South America, Europe, Africa, and Asia, representing low, middle, and high resource countries with a diversity of national health care systems. Contributors ethnographically map the varied nature of cancer experiences and articulate the multiplicity of meanings that survivorship, risk, charity, and care entail. They explore institutional frameworks shaping local responses to cancer and underlying political forces and structural variables. Treating Fear of Cancer Recurrence with Group Cognitive-Behavioural Therapy: A Step-by-Step Guide Josée Savard, Aude Caplette-Gingras, Lucie Casault, Jennifer Hains, 2022-12-02 Cancer is the leading cause of death in the United States. The improvement of screening procedures and treatments have led to higher survival rates and consequently to an increased number of individuals who fear that their cancer might come back. Fear of cancer recurrence (FCR) is defined as the fear, worry, or concern that cancer may come back or progress. FCR has been found to be the number one unmet need of cancer survivors. High levels of FCR are associated with greater psychological distress, impaired functioning, decreased quality of life, and increased medical consultations, psychotropic usage, and health care costs. It is therefore crucial to offer these patients an appropriate and effective treatment. The book first proposes a theoretical model of FCR that identifies the five main targets of intervention in this program: 1) cognitive interpretation, 2) behavioural avoidance, 3) cognitive avoidance, 4) reassurance and control seeking, 5) intolerance of uncertainty. Then each target is discussed and specific cognitive behavioural therapy strategies are suggested that focus on each of them based on the best available empirical evidence for the treatment of anxiety disorders, e.g. generalized anxiety disorder and cancer-related anxiety. This book will be of interest to clinicians working with cancer patients such as psychologists and other health care providers as well as cancer patients and survivors. Graduate students in clinical health psychology and connecting disciplines such as psycho-oncology, psychiatry, nursing, social work, rehabilitation, spiritual care, and sexology might also find this text of value.

Manuel de sexologie Patrice Lopès, François-Xavier Poudat, 2022-01-11. D'ordinaire, on considère comme fondamentale la santé sexuelle et la prise en charge de ses dysfonctionnements constituent une discipline médicale associant de nombreux professionnels de santé. Analysant les bases neurophysiologiques et neuropsychologiques de la sexualité humaine avant de décrire la chimie des troubles sexuels chez l'homme et la femme, cet ouvrage qui est devenu une référence apporte tous les éléments pour comprendre la sexualité et prendre en charge ses troubles, la suite de données anatomiques cliniques, les auteurs issus d'horizons divers mais complémentaires. AIUS, association interdisciplinaire post-universitaire de sexologie, abordent successivement l'adolescence, la sexualité au féminin et au masculin, les problèmes sexuels du couple, les perversions et agressions sexuelles et précisent tous les aspects juridiques et éthiques de la sexualité. Après le succès des précédentes éditions, cette 4^e édition a fait l'objet d'une entière révision et mise à jour, notamment sur les aspects génétiques, l'influence de la ménopause, du vieillissement et les traitements. Les réseaux sociaux et la protection des femmes sont également abordés. Cet ouvrage est destiné à tous les étudiants des DIU de sexologie, aux internes, médecins généralistes, gynécologues, psychiatres, psychothérapeutes, sages-femmes et sexologues, ainsi qu'à toutes les spécialités concernées de près ou de loin par les pathologies liées ou engendrant des troubles sexuels.

Plans de soins et dossier infirmier Lynda Juall Carpenito, 1997-11-24. Cet ouvrage présente les soins infirmiers sous une perspective nouvelle. Au-delà du traitement des situations du patient que l'infirmier peut également traiter, ce guide précieux met l'accent sur le dossier infirmier et recouvre l'intégralité des soins. Il comprend les plans de soins infirmiers destinés à tous les adultes malades indépendamment de leur situation clinique. Il présente des plans de soins adaptés pour des situations cliniques spécifiques. Enfin, il reprend la fois les problèmes traités en collaboration et les diagnostics infirmiers.

Syndromes et réflexes pour les ECNi et la clinique Stanislas Quesada, 2021-04-13. Une double approche : compiler les syndromes et maladies, nom propre et développer des réflexes médicaux pratiques pour un double objectif : la pratique clinique et les ECNi. Le tout dans un format poche spiralé pour en faire un ouvrage compagnon indispensable.

Leffler Heerfordt Wallenberg Fitz Hugh Curtis Moschowitz ou encore Li Fraumeni. Autant deronymes, la fois vocateurs et embarrassants pour les étudiants en médecine, notamment par leur nombre. Néanmoins, la Syndromologie ou connaissance des différents syndromes constitue un maillon essentiel en vue de la démarche diagnostique. La première partie de l'ouvrage s'attelle donc à réunir l'ensemble des syndromes et maladies, synonymes dissimulés dans les ouvrages des Collèges universitaires et en propose une description exhaustive tirant des recherches extérieures. Plus de 500 syndromes sont ici classés par discipline.

Un index en fin d'ouvrage permet de retrouver aisément le terme recherché. Directement hérité de la médecine d'Hippocrate, la transmission transgénérationnelle par aphorismes avait pour vocation l'acquisition des grands axes de réflexion en vue d'affiner sa pratique clinique. Reprenant cette philosophie, la seconde partie de l'ouvrage regroupe plus de 2 000 aphorismes rédigés pour se forger les réflexes cliniques acquies face des situations médicales typiques et/ou urgentes. Cette rédaction s'est faite en se focalisant sur les notions essentielles des items abordés dans les ouvrages des Collèges universitaires. Dans un souci de facilité d'apprentissage, les aphorismes sont classés par matière et regroupés par situations de départ et contextes cliniques.
