Urbanization and Industrialization for Africa's Transformation ,2017 The 2017 Economic Report on Africa focuses on the linkages between industrialization and urbanization Urbanization is one of Africa mega trends with profound implications for the social economic environmental dimensions of growth and transformation Theory and experience demonstrate that industrialization and urbanization can be mutually reinforcing processes It is therefore imperative to explore the linkages between urbanization and industrialization given the profound implications for structural transformation in Africa So far current policy narratives and frameworks on structural transformation and industrialization in Africa have largely failed to factor in the spatial and urban dimensions of industrialization and in particular the advantages presented by productivity enhancement and agglomeration effects generated by cities Yet the nexus between urbanization and industrialization is of particular relevance for Agenda 2063 and the 2030 Agenda on Sustainable Development Both agendas recognize urbanization as a critical factor for sustainable development It is also important to consider urbanization and industrialization in light of Africa s engagement with the Third United Nations Conference on Housing and Sustainable Urban Development Habitat III to be held in Quito Ecuador in October 2016 In this context African policy makers have clearly recognized urbanization as an engine of structural transformation for inclusive and sustainable growth
