

Measuring engagement is critical to understanding your workforce and its needs. Trends in employee engagement are insightful since they're linked to many organizational performance outcomes. As you can see in the trend line above, engagement levels have varied slightly over the past five years.

In 2023, we saw engagement levels drop back to pre-pandemic levels with 50% of employees engaged and 48% disengaged or what some may consider 'quiet quitting'. When compared with 2021 peak engagement levels of 57%, employees are feeling significantly less engaged and less satisfied with their organizations year over year. Actively disengaged employees account for approximately \$3.8 trillion in lost productivity nationally.¹ Since 2020, the percentage of actively disengaged and opportunity group employees have increased by two and three percentage points respectively.

Understanding Employee Engagement Zinta S. Byrne, 2022-02-25 Understanding Employee Engagement is a comprehensive source for the science and practice of employee engagement. This book provides a rigorous and objective review of scholarship and empirical research on engagement from around the world. Grounded in theory and empirical research, this book debates the definitions of engagement, provides a thorough evaluation of empirical findings in the engagement field, including a focus on international findings, and offers practice implications for organizations. The book is broad with references and research across disciplines and countries, as well as new sections addressing current challenges such as virtual engagement, engaging the aging workforce, and perspectives on diversity and inclusion. Employers can learn how to foster an engaged organization; practitioners can learn how to measure, identify, and implement evidence-based solutions to disengagement; and researchers can master the existing engagement literature and begin to study the many propositions and new models the author proposes throughout the book.
