Animation Chris Pallant, 2021-01-01 *Animation: Critical and Primary Sources* is a major multi-volume work of reference that brings together seminal writings on animation studies. Gathering historical and contemporary texts from a wide-ranging number of sources, the volumes provide a key resource in understanding and studying the past and future directions of animation studies. The four volumes thematically trace animation studies from its many definitions or a lack thereof to the institutional nature of animation production to establishing greater space within animation discourse for the consideration of broadcast and interactive animation and finally giving greater contextual understanding of the field of animation studies by focusing on Authorship, Genre, Identity, Politics, and Spectatorship, thus enabling readers to engage more deeply with the ideas discussed in the final volume. Ordering the collection in this way avoids imposing an overly simplistic chronological framework, thereby allowing debates that have developed over years and even decades to stand side by side. Each volume is separately introduced and the essays structured into coherent sections on specific themes. **Software, Animation and the Moving Image**
