Radvansky,2015-08-20 Provides students with a guide to human memory its properties theories about how it works and how studying it can help us understand who we are and why we do the things that we do For undergraduate and graduate courses in Human Memory This book provides a very broad range of topics covering more territory than most books In addition to some coverage of basic issues of human memory and cognition that are of interest to researchers in the field the chapters also cover issues that will be relevant to students with a range of interests including those students interested in clinical social and developmental psychology as well as those planning on going on to medical and law schools The writing is aimed at talking directly to students as opposed to talking down to them in a clear and effective manner Not too dense but also not too conversational as well This 2nd edition includes a series of exercises that allow the student to try out the concepts and principles conveyed in the chapters or to use as the basis for exploring their own ideas *Adopting Information Systems Perspectives from Small Organizations* Özgün Imre,2017-12-08

Why do organizations adopt information systems Is it just because of financial reasons of concerns for efficiency Or is it due to external pressures such as competitor pressure that an organization adopts an information system And how does the adoption take place Is it a linear process or is the process one of conflicts Does a specific person govern this process or do we

have multiple parties involved What happens if these conflicts occur among those involved How does the organization move on and achieve a successful information system adoption By investigating two organizations one international academic journal and one South American manufacturing company this thesis aims to investigate the whys and hows of information system adoption and aims to contribute to the discourse on information system adoptions in small organizations an often underrepresented segment in information system adoption literature By adopting different theoretical lenses throughout the five research papers included this body of work suggests that even when seemingly simple information system adoptions can become rather complex The cases reveal that the role of information systems and issues related to information system adoptions are often not well thought out in the early days of the organization The actors understandings of adoption and consequences mature and the information systems become more intertwined Common use of stakeholder theory introduces general stakeholders and their interaction with the focal organization The cases reveal that the adoption process involves multiple actors even within what would initially appear as a stakeholder and that those actors can be in conflict with each other These conflicts often lead to negotiations and the cases reveal that these negotiations are opportunities of learning the actors engage with the information system and with each other gaining new knowledge about the issues at hand The dissertation argues that there are various social worlds in information system adoptions and various factors ranging from organizational structure to social norms that often affect why and how the organization undergoes an adoption process The multiple power relations and divergent interests of stakeholders in these adoption processes and how information systems affect other parts of the organization reinforce the need for a well thought out flexible and reflexive approach to information system adoptions

How Boston Played Stephen Hardy,2003 Whether consciously molding the city through the construction of public spaces or developing social ties through organizations such as athletic clubs Bostonians of all classes participated in recreation based community building often at cross purposes Elite Bostonians for instance promoted the establishment of parks as a

healthy alternative to unsavory activities such as drinking and gambling that they associated with the city's vast new pool of immigrants. They were soon forced to compromise however with citizens who were less interested in the rhetoric of moral uplift than in using the parks for competitive athletics and commercial amusements. **BOOK JACKET**
