How to Write Better Medical Papers Michael Hanna, 2019-03-20 This book guides medical researchers through all stages of transforming their scientific data and ideas into a published paper Many researchers in medicine including the life sciences and health sciences struggle to get their research written and published Manuscripts are typically rejected and or sent back for revisions several times before ever being published One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers research methodology ethics statistics data visualization writing revising and the practicalities of publishing Instead of wasting the reader s time discussing trivialities of punctuation spelling etc this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals The section Preparing covers the range of methodological ethical and practical aspects that researchers need to address before starting to write their paper The section Analyzing reviews commonplace problems in the statistical analysis and presentation and how to resolve those problems The section Drafting

describes what to write in all the various parts of a paper the Introduction Methods Results Discussion Abstract etc The section Revising explains and illustrates how to improve the writing style of any manuscript The section Publishing discusses how to navigate the peer review process and all other practical aspects of the publishing phase This book draws on the author's decade of experience as an independent medical writer and research consultant but it is not written merely as the personal opinion of yet another expert The entire book is grounded in the existing scientific and scholarly literature with extensive references and a lengthy annotated bibliography so readers can quickly obtain more information on any aspect they want Thus this book provides a more evidence based scholarly account of how medical scientific papers should be written in order to improve medical communication and accelerate scientific progress After reading this entire book cover to cover medical researchers will know how to write better quality medical papers and they will be able to publish their work in better journals with less time and struggle This book is essential reading for anyone conducting research in clinical medicine life sciences or health sciences

Citation Analysis and Dynamics of Citation Networks Michael Golosovsky, 2019-09-26 This book deals with the science of science by applying network science methods to citation networks and uniquely presents a physics inspired model of citation dynamics This stochastic model of citation dynamics is based on a well known copying or recursive search mechanism The measurements covered in this text yield parameters of the model and reveal that citation dynamics of scientific papers is not linear as was previously assumed This nonlinearity has far reaching consequences including non stationary citation distributions diverging citation trajectories of similar papers and runaways or immortal papers with an infinite citation lifespan The author shows us that nonlinear stochastic models of citation dynamics can be the basis for a quantitative probabilistic prediction of citation dynamics of individual papers and of the overall journal impact factor This book appeals to students and researchers from differing subject areas working in network science and bibliometrics
