IT Essentials (ITE v6.0 + v7.0) Chapter 2 Exam Answers 100%

1. What is a good safety precaution to take when opening a computer case?

- **Place tape over the case edges that are sharp.***
- Remove the cover (or door) of the computer case before installing or removing parts.
- Remove the connections to the front panel before extending the case fully open.
- Ensure that any loose clothing such as a tie or shirt stay in constant contact with the case when handling internal components.

Explanation: Computer cases can easily be a hazard to technicians. Before working inside a computer, examine the case edges and put tape over any of the sharp edges to prevent physical harm. A case is opened, but seldom removed when installing or removing parts. Loose clothing should be secured before you work inside a computer.

2. What does the "A" in P-A-S-S remind a person to do while using a fire extinguisher?

- Aim the fire extinguisher at the flames.
- **Aim the fire extinguisher at the base of the fire.***
- Activate the fire extinguisher.
- Adjust the pressure.

Explanation: When using the P-A-S-S memory aid with a fire extinguisher, the "A" in P-A-S-S is for aiming at the base of the fire and not at the flames.

3. How is a power supply commonly attached to a tower case?

- restraining strap
- retention bar
- **screws.***
- standoffs

Explanation: To install a power supply into a PC tower case, open the case, align the power supply with the case holes, and use screws to attach the power supply to the case.

4. A technician is replacing a power supply. Which two factors should the technician consider when obtaining the replacement part? (Choose two.)

- **type of case***
- input voltage level of 12 or 5 VDC
- number of internal fans
- output voltage
- **wattage***

Explanation: A technician should consider the following when choosing a power supply: Type of motherboard

Wattage

Number and type of connectors

Type of case

The computer input power level is either 120 or 240 VAC. Output voltages are standard 3.3, 5, and 12 VDC. A power supply normally has one fan and this is not a selectable option on a fan.
