Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East Cynthia S Sunal,Oluseyi Matthew Odebiyi,Kagendo Mutua,2022-06-01 As the demand for education at all levels has increased so have the models of meeting these increased demands for education As in many other parts of the world public

education has expanded to serve large populations across the regions of Africa the Caribbean and the Middle East Many nations in these regions have instituted mandates policies and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace Because the increase in educational demand has occurred at all levels these efforts often address various levels of education from early childhood through primary schooling junior secondary and secondary schooling and into tertiary education Efforts also have been made to increase participation in education by marginalized and or special populations The range of efforts is large with some focusing on involving migrants immigrants refugees in primary education while others aim at opening up choices at the university level Recently nations in the region have recognized the possibilities of digital learning online learning as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to populations previously unreached or to address difficult to reach sectors of the population At the same time the population itself has not only increased in numbers but in diversity Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging if not problematic Effects of Government Mandates and Policies on Public Education in Africa the Caribbean and the Middle East is Book IX of the series Research on Education in Africa the Caribbean and the Middle East Chapters document describe and or raise critical issues and or questions resulting from government policies mandates and frameworks intended to make available public education to an ever growing populace while at the same time being mindful of improving quality of education being availed to an increasingly diverse populace **The West African Methodist**

Collegiate School, 1911-2021 Christopher E. S. Warburton, 2021-12-22 The West African Methodist Collegiate School 1911 2021 presents an intricate analysis of challenging missionary work in Sierra Leone and West Africa In meticulous detail the book revisits an era that spans the slave trade and the manumission of slaves and examines the ways that missionaries helped to educate former slaves and free men for a viable form of existence The checkered history of the school chronicles the adversities courage and determination of men who dared to preserve an educational institution that was designed to provide religious and secular education In more elaborate terms the book reveals how changing circumstances and conditions of the twenty first century can obscure a nineteenth century concept when socioeconomic challenges and the vicissitudes of war and epidemics become too overpowering **Some Developments in Research in Science and**

Mathematics in Sub-Saharan Africa Lorna Holtman, 2008 Much attention in late developing countries is given to providing access to studies which allow school leavers to enter science and technology related careers These programmes are driven by the belief that graduates will then substantially contribute to the developmental needs of their countries But is providing access to institutions enough Students in developing countries often come from school environments lacking in

resources human physical and financial This book in a number of chapters reviews research related to the crucial dimension of epistemological access to the disciplines of import which students need as much as institutional access in order to improve their chances of success A significant feature of this collection s research studies is that their empirical bases are highly localised covering areas such as research methods access curriculum instruction and assessment and the relevance of science and mathematics education in Zimbabwe Uganda Swaziland South Africa Namibia Malawi Ghana and Lesotho This volume provides invaluable insights and will be of relevance to researchers policy makers and lecturers interested in these research outcomes in Sub Saharan Africa It is the outcome of a doctoral research capacity development project the Graduate Studies in Science Mathematics and Technology Education GRASSMATE **Golden Social Studies for J.S.S. 1, 2 & 3**

Okyere Baafi Alexander,2002 *Gobarau* ,2003 Home was Uncomfortable; School was Hell Cecilia Sem Obeng,2002

Ghana has faced strong gender bias inside its educational institutions since gaining independence from Britain This prejudice is fuelled by the legacy of the colonial powers nurtured by Ghana s traditional anti female beliefs and made worse by various social crises and irresponsible politicians These factors combine to limit girls educational experiences keeping females in complete submission to males Many of the studies done on girls education have focused on comparing the student population of girls and boys but this book looks at the role played by societal belief systems and socio educational and economic crises impacting girls schooling The author tells about the problems Ghanaian girls face through her own memories as a child and as a teacher in Ghanaian school This book uses case studies of four girls who dropped out of school and their families and teachers to further the understanding of gender issues faced by Ghana in particular and educational systems in general
