Respect for Teachers Brian Ford, 2012-12-27 For over 30 years we have been in the midst of a paradox. Following a questionable logic that sees education as a means to economic ends, efforts to reform education have focused on keeping the US from slipping in international economic competition. Relying on testing as a standard, in the end we may have decreased our human potential and become less competitive. Our system has gotten worse at its core in its philosophical tenets and in its ultimate effects by placing unwonted pressure on our youth and in stifling their creativity. While this goes back decades, *Respect for Teachers* takes its title from a phrase, perhaps a codeword, in President's 2011 State of the Union address and sits down to consider its implications. Connecting attacks on teachers' unions and schools and the misrepresentation of research to the promotion of new economic models in education, it suggests that the Obama administration may be without quite realizing it setting the stage for rapid privatization of the public system. As this endangers the egalitarian basis of democracy, it also reminds us that schooling is big business: many trillions of dollars world wide. Joseph Schumpeter once said, "No bourgeoisie ever disliked war profits." *Respect* operates under the premise that no bourgeoisie ever disliked the spoils of school reform either.

Assessment and Teaching of 21st Century Skills Patrick Griffin, Barry McGaw, Esther Care, 2011-10-20 Rapid and seemingly accelerating changes in the economies of developed nations are having a proportional effect on the skill sets required of workers in many new jobs. Work environments are often technology heavy while problems are frequently ill defined and tackled by multidisciplinary teams. This book contains insights based on research conducted as part of a major international project supported by Cisco, Intel, and Microsoft. It faces these new working environments head on, delineating new ways of thinking about 21st century skills and including operational definitions of those skills. The authors focus too on fresh approaches to educational assessment and present methodological and technological solutions to the barriers that hinder ICT based assessments of these skills, whether in large scale surveys or classrooms. Equally committed to defining its terms and providing practical solutions and including international perspectives and comparative evaluations of assessment methodology and policy, this volume tackles an issue at the top of most educationalists' agendas.

Understanding the Fundamentals of the U.S. Presidential Election System Alexander S. Belenky, 2012-04-25 This is the first book on the U.S. presidential election system to analyze the basic principles underlying

the design of the existing system and those at the heart of competing proposals for improving the system The book discusses how the use of some election rules embedded in the U S Constitution and in the Presidential Succession Act may cause skewed or weird election outcomes and election stalemates The book argues that the act may not cover some rare though possible situations which the Twentieth Amendment authorizes Congress to address Also the book questions the constitutionality of the National Popular Vote Plan to introduce a direct popular presidential election de facto without amending the Constitution and addresses the plan s Achilles Heel In particular the book shows that the plan may violate the Equal Protection Clause from the Fourteenth Amendment of the Constitution Numerical examples are provided to show that the counterintuitive claims of the NPV originators and proponents that the plan will encourage presidential candidates to chase every vote in every state do not have any grounds Finally the book proposes a plan for improving the election system by combining at the national level the one state one vote principle embedded in the Constitution and the one person one vote principle Under this plan no state loses its current Electoral College benefits while all the states gain more attention of presidential candidates
