Fienberg, David C. Hoaglin, William H. Kruskal, Judith M. Tanur, 2012-12-06 A large number of Mosteller's friends, colleagues, collaborators and former students have contributed to the preparation of this volume in honor of his 70th birthday It provides a critical assessment of Mosteller's professional and research contributions to the field of statistics and its applications Mathematical Thinking and Problem Solving Alan H. Schoenfeld, Alan H. Sloane, 2016-05-06 In the early 1980s there was virtually no serious communication among the various groups that contribute to mathematics education: mathematicians, mathematics educators, classroom teachers and cognitive scientists Members of these groups came from different traditions, had different perspectives and rarely gathered in the same place to discuss issues of common interest Part of the problem was that there was no common ground for the discussions given the disparate traditions and perspectives As one way of addressing this problem, the Sloan Foundation funded two conferences in the mid 1980s bringing together members of the different communities in a ground-clearing effort designed to establish a base for communication In those conferences interdisciplinary teams reviewed major topic areas and put together distillations of what was known about them A more recent conference upon which this volume is based offered a forum in which various people involved in education reform would present their work and members of the broad communities gathered would comment on it The focus was primarily on college mathematics informed by developments in K-12 mathematics The main issues of the conference were mathematical thinking and problem solving Cumulated Index Medicus, 1987 *Understanding Models for Learning and Instruction*: Dirk Ifenthaler, Pablo Pirnay-Dummer, J. Michael Spector, 2008-02-22 For more than 25 years the pioneering research and theories of Norbert Seel have had a profound impact on educational thought in mathematics In this special tribute an international panel of researchers present the current state of model-based education, its research methodology and technology Fifteen stimulating, sometimes playful chapters link the multiple ways of constructing knowledge and domains as diverse as cognitive science, computer science and philosophy to the complex real world of skill development generalize model-based theories into educational settings and explain how to design and evaluate model-centered learning environments Extensive reading lists, provocative graphics and a wealth of cultural touchstones from the Bible to Bob Dylan make *Understanding Models for Learning and Instruction* an accessible yet thought-provoking collection A sampling of the topics covered: Evidence-based assessment of learning models Translating cognitive theory into educational practice New approaches to tracking mental change over time Applying psychoeducational theory to the hands-on classroom Using games as a strategy for constructing model-centered learning environments Externalizing mental models with Mindtools This synthesis of latest innovations and

fresh perspectives on classic constructs makes Understanding Models for Learning and Instruction cutting edge reading for the researchers and educators in mathematics instruction building the next generation of educational models

Engineering Education John Heywood, 2005-12-12 A synthesis of nearly 2 000 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development The author s first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum s internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation
