Factor Impact Journal List:

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrops rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences Accounting Journals: Scopus, Web of Science, SCImago Liudmyla Shkulipa, 2020-03-09 This book is a full guidebook among more than 218 accounting international journals with an evaluation of 3 000 publications for over the last two years It aims to help readers for selecting an appropriate journal for publishing own research in the international arena or to find the required topic for conducting further investigating or to be informed about so large scale science as accounting Here a reader will find detailed information about accounting journals in terms of Scopus Web of Science and SCImago databases In addition there are highlighted accounting journals in terms of IFRS and blockchain concentration in accounting researches nowadays The relevant aims and scope of each journal are also presented Anyway this book is an indispensable assistant for students while getting the Accounting specialization as well as teachers and scientists while conducting empirical researches in the practice and theory of the accounting filed Collection Evaluation in Academic Libraries Karen C. Kohn, 2015-06-24 Librarians have long used data to describe their collections Traditional measures have simply been inputs and outputs volumes acquired processed owned or circulated With the growth since the 1990s of cultures of assessment librarians have sought statistics that are evaluative rather than simply descriptive More recently exponentially increasing journal prices and an economic recession have intensified the need to make careful purchasing decisions and to justify these to administrators A methodical evaluation of a library collection can help librarians understand and meet user needs and can help communicate to administrators that the library is a good use of the institution s money Collection Evaluation in Academic Libraries A Practical Guide for Librarians equips collections managers to select

and implement a method or several methods of evaluating their library collections It includes sections on four tools for evaluation Comparison to peer institutions Core lists Usage statistics from circulation and ILL Citation analysis Chapters on each of these approaches present the advantages and disadvantages of each method instructions on data collection and analysis with screenshots and suggested action steps after completing the analysis With a unique combination of step by step instructions and discussions of the purpose and role of data this book provides an unusually thorough guide to collection evaluation It will be indispensable for collection development librarians and anyone looking to strengthen the culture of assessment within the library

International Relations in France Henrik Breitenbach, 2013-06-19 Why is the French International Relations (IR) discipline different from the transnational American discipline? By analysing argument structures in research articles across time this book shows how the discipline in France is caught between the American character of the discipline and the French state as regulator of legitimate forms of expression. Concretely French research arguments are less explicit about what their propositions are and what academic discussions they draw on and add to than their transnational American counterparts. Based on a comparative case study of French and American IR research from 1950 to 2011 the book is a major contribution to the meta-IR literature on global, regional and national traditions of IR. The challenge to the French discipline of whether and how to position itself in relation to the evolving American discipline is in many ways exemplary for other non-American national IR disciplines and the choices as well as the structural conditions underlying the French case are relevant to all non-Western disciplines. The comparative analysis moreover reveals that the modern American discipline, what is considered as recognisable social science, takes shape only during the 1970s. The book thus offers new knowledge about the discipline's international development as such. Both case and methodology are interesting to larger audiences outside IR in the history and sociology of social science, contrastive rhetoric as well as French and cultural studies.

Pathways to International Publication in the Social Sciences Insung Jung, 2025-01-20 This guide offers a clear step-by-step approach for graduate students and early career researchers, especially non-native English speakers seeking to publish in international journals in the social sciences. It provides practical strategies for preparing, submitting and refining research papers, helping researchers navigate the challenges of academic publishing. With 21 chapters the guide covers every stage of writing, revising and submission while addressing the unique obstacles faced by non-native English speakers. The guide helps researchers identify reputable journals, avoid predatory ones and use digital tools to meet international standards. It then provides a structured roadmap that simplifies the publication process, covering steps like journal selection, writing compelling abstracts and drafting the methods and results sections. By the end of the guide it is expected that researchers will have a strong first draft or ideally a submission-ready manuscript. The guide also addresses language barriers, cultural differences and unfamiliarity with international conventions. It offers practical solutions for improving English writing, utilizing digital tools, responding to peer reviews and managing revisions effectively. It emphasizes ethical guidelines like avoiding plagiarism.

properly crediting co authors and ensuring research transparency to help researchers meet global standards Unlike other research guides this one is specifically tailored to early career and non native English researchers working in social science disciplines It offers practical strategies and real world examples to equip researchers and teachers of research methods and academic writing with a framework for achieving publishing success in global academia **Informetrics** Junping Qiu,Rongying Zhao,Siluo Yang,Ke Dong,2017-04-08 This book provides an accessible introduction to the history theory and techniques of informetrics Divided into 14 chapters it develops the content system of informetrics from the theory methods and applications systematically analyzes the six basic laws and the theory basis of informetrics and presents quantitative analysis methods such as citation analysis and computer aided analysis It also discusses applications in information resource management information and library science science of science scientific evaluation and the forecast field Lastly it describes a new development in informetrics webometrics Providing a comprehensive overview of the complex issues in today s environment this book is a valuable resource for all researchers students and practitioners in library and information science
