the New Economy Darina Lepadatu, Thomas Janoski, 2020-02-18 This book examines the dominance and significance of lean organizing in the international economy. Scholars from each discipline see lean production as positive or negative; the book blends theory with practice by sorting out these different academic views and revealing how lean is implemented in different ways. The first part synthesizes academic research from a range of disciplines including engineering, sociology, and management to present the reader with an integrated understanding of the benefits and drawbacks of lean management. The second part links this theory to practice with a set of case studies from companies like Apple, Google, Nike, Toyota, and Walmart that demonstrate how lean is implemented in a variety of settings. The book concludes with three models explaining how Toyotism, Nikefication with offshoring, and Waltonism provide full or less complete models of lean production. It clearly presents the positive and negative aspects of lean and insights into the culture of lean organizations. With its rich interdisciplinary approach, *Framing and Managing Lean Organizations in the New Economy* will benefit researchers and students across a range of classes from management, sociology, and public policy to engineering.

Rethinking Poverty Barry Knight, 2017-08-30 Available Open Access under CC BY-NC licence. In our society, a wealthy minority flourish while around one fifth experience chronic poverty, and many people on middle incomes fear for their futures. Social policy has failed to find answers to these problems, and there is now a demand for a new narrative to enable us to escape from the crisis in our society. With the aim of ending poverty, this book argues that we need to start with the society we want rather than framing poverty as a problem to be solved. It calls for a bold, forward-looking social policy that addresses continuing austerity, under-resourced organisations, and a lack of social solidarity. Based on a research programme carried out by the Webb Memorial Trust involving leading organisations, academics, community activists, children, and surveys of more than 12,000 people living in poverty, a key theme is power, which shows that the way forward is to increase people's sense of agency in building the society that they want.

Reframing the Leadership Landscape Roger Hayes, Reginald Watts, 2016-03-03 In an uncertain and complex world, leaders should not merely respond to the speed of change but attempt to anticipate it. Sometimes it is unexpected; sometimes the signs are there but the dots are not joined together. The NEW normal must be navigated, negotiated, networked, and a narrative built around it. Leaders need to adapt to a changing ecosystem in which the biggest challenges cross the boundaries of the public, private, and non-profit sectors, requiring much closer collaboration. Aggressive individualism is no longer a sustainable basis for companies needing to deliver social and economic value; now enterprises must move beyond narrow self-interest and short-termism to balance stakeholder expectations. In *Reframing the Leadership Landscape*, Dr Roger Hayes and Dr Reginald Watts argue that the interconnected and interdependent world requires leaders to adopt a more holistic and inclusive approach. Despite global business education advances, business mostly fails to make cross-disciplinary connections or interpret weak signals and is ill-prepared for changes in cultural and technical demands. The tool kit is here, ready to be unpacked. The only question is whether aspirant leaders are sensitive enough to read the signals.

and develop the skills needed to create an essential collaborative paradigm which they must do if they wish to regain trust fill the leadership void and help reshape a sustainable future Narratives of Technology J. M. van der Laan, 2016-06-11 This book documents and investigates the stories we have told and continue to tell about technology now the dominant feature of our civilization in fiction non fiction film and advertising It answers important questions about the meanings people ascribe to technology the hopes and fears we express in the different narratives the effect of those narratives upon us and the new forms of myth those narratives represent Narratives of Technology offers an approach grounded in the humanities adding another perspective to that of social scientists and technologists
