

Example

Calculate the mean for all values of x and y for the data represented by the table below. Assume that the number of observations for each value of x and y is the same. Assume that the number of observations for each value of x and y is the same. Assume that the number of observations for each value of x and y is the same.

- (i) Use Table 1 to complete the following table:

	Relative frequency	In the number of observations for the value x for the value y	In the number of observations for the value x for the value y	In the number of observations for the value x for the value y	Range for the value y
Lowest	0.05				10
Second					20
Third		0.10			30
Fourth				0.15	40
Fifth	0.20		0.20	0.20	50
Sixth					60

- (ii) Based on the table you completed in question (i), what is the range for the lowest observations in the data?
- (iii) What is the range for the highest observations?
- (iv) What is the range for the highest observations?
- (v) What is the range for the highest observations?
- (vi) What is the range for the highest observations?

Modern Gas-Based Temperature and Pressure Measurements Franco Pavese,Gianfranco Molinar Min Beciet,2012-09-28 This 2nd edition volume of Modern Gas Based Temperature and Pressure Measurements follows the first publication in 1992 It collects a much larger set of information reference data and bibliography in temperature and pressure metrology of gaseous substances including the physical chemical issues related to gaseous substances The book provides solutions to practical applications where gases are used in different thermodynamic conditions Modern Gas Based Temperature and Pressure Measurements 2nd edition is the only comprehensive survey of methods for pressure measurement in gaseous media used in the medium to low pressure range closely connected with thermometry It assembles current information on thermometry and manometry that involve the use of gaseous substances which are likely to be valid methods for the future As such it is an important resource for the researcher This edition is updated through the very latest scientific and technical developments of gas based temperature and pressure measurements using thermometry and manometry and brings all of the techniques together under one cover This book fills the gap in international literature as no other recently published book provides a comprehensive survey for gaseous media closely connected with thermometry Updates in this new edition include revised appendices and new chapters on Mutual Recognition Agreement of the Comit International des Poids et Mesures and its main applications and developments in the European Metrology Society

Lesson 45 ADvTECH., *LAWS OF GASES* ROBERT. BOYLE,2018 **On the Establishment of the Thermodynamic Scale of Temperature by Means of the Constant-Pressure Thermometer (Classic Reprint)** Edgar Buckingham,2016-11-13 Excerpt from On the Establishment of the Thermodynamic Scale of Temperature by Means of the Constant Pressure Thermometer The resulting value depends somewhat on the magnitude of the constant pressure and on the nature of the gas used so that there are various constant pressure scales If the thermometric gases employed be always

far from condensation so that they follow Boyle's law approximately all these scales are nearly identical the numerical value assigned to any given temperature is nearly the same no matter which scale is used The adoption of any particular scale is arbitrary and except in work of the highest precision one is as good as another About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
