**Foundations and Trends in Smart Learning** Maiga Chang, Elvira Popescu, Kinshuk, Nian-Shing Chen, Mohamed Jemni, Ronghuai Huang, J. Michael Spector, Demetrios G. Sampson, 2019-03-14. This book focuses on the interplay between pedagogy and technology and their fusion for the advancement of smart learning environments. It discusses various components of this interplay including learning and assessment paradigms, social factors and policies, emerging technologies, innovative application of mature technologies, transformation of curriculum and teaching behavior, transformation of administration, best infusion practices and piloting of new ideas. The book provides an archival forum for researchers, academics, practitioners and industry professionals interested and or engaged in reforming teaching and learning methods by promoting smart learning environments. It also facilitates discussions and constructive dialogue among various stakeholders on the limitations of existing learning environments, the need for reform, innovative uses of emerging pedagogical approaches and technologies and sharing and promoting best practices leading to the evolution, design and implementation of smart learning environments.

***Early mathematics counts*** Yasmin A. Sitabkhan, Linda Platas, 2018-07-23. This occasional paper examines common instructional strategies in early grade mathematics interventions through a review of studies in classrooms in low and middle income countries. Twenty-four studies met the criteria for inclusion and analyses reveal four sets of instructional strategies for which there is evidence from multiple contexts. Of the 24 studies, 16 involved the use of multiple representations, 10 involved the use of developmental progressions, 6 included supporting student use of explanation and justification and 5 included integration of informal mathematics. Based on the review, we provide conclusions and recommendations for future research and policy.

***Posing and Solving Mathematical Problems*** Patricio Felmer, Erkki Pehkonen, Jeremy Kilpatrick, 2016-04-29. This book collects recent research on posing and solving mathematical problems. Rather than treating these two crucial aspects of school mathematics as separate areas of study, the authors approach them as a unit where both areas are measured on equal grounds in relation to each other. The contributors are from a vast variety of countries and with a wide range of experience, it includes the work from many of the leading researchers in the area and an important number of young researchers. The book is divided in three parts: one directed to new research perspectives and the other two directed to teachers and students respectively.
