A Performance Assessment of NASA's Heliophysics Program National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Heliophysics Performance Assessment, 2009-04-24 Since the 1990s the

pace of discovery in the field of solar and space physics has accelerated largely owing to NASA investments in its Heliophysics Great Observatory fleet of spacecraft These enable researchers to investigate connections between events on the Sun and in the space environment by combining multiple points of view Recognizing the importance of observations of the Sun to Earth system the National Research Council produced a solar and space physics decadal survey in 2003 laying out the Integrated Research Strategy This strategy provided a prioritized list of flight missions plus theory and modeling programs that would advance the relevant physical theories incorporate those theories in models that describe a system of interactions between the Sun and the space environment obtain data on the system and analyze and test the adequacy of the theories and models Five years later this book measures NASA's progress toward the goals and priorities laid out in the 2003 study Unfortunately very little of the recommended priorities will be realized before 2013 Mission cost growth reordering of survey mission priorities and unrealized budget assumptions have delayed nearly all of the recommended NASA spacecraft missions The resulting loss of synergistic capabilities in space will constitute a serious impediment to future progress

Reimagining Nigeria's Educational System Joseph A. Balogun, 2023-09-20 This book assesses the challenges within the Nigerian educational system and provides a concrete plan to revitalize the low performing system by strengthening high stakes testing at all levels In Nigeria many citizens believe that

the solution to the country's low performance in education is to eliminate high stakes standardized testing. High stakes testing refers to applying standardized student achievement tests as a primary mechanism to evaluate students, teachers, and their school's performance. This book argues that the poor quality of education and low ranking of Nigeria's educational system is not related to the negative consequences of high stakes testing but rather is due to many intrinsic factors. By conducting a comparative analysis of six high performing education systems worldwide, the book offers a comparative summative evaluation of the educational system and offers recommendations. This book will be of interest to policymakers and scholars in the fields of African education, higher education quality, and global studies. African studies, management, and administration, leadership, and professional development studies. Joseph Abiodun Balogun is former Dean and retired Distinguished University Professor at the College of Health Sciences, Chicago State University, USA. Visiting Professor, Program Consultant at the Centre of Excellence in Reproductive Health Innovation, University of Benin, Nigeria, and President, CEO, Joseph Rehabilitation Center, Tinley Park, Illinois, USA.

Serious Games Analytics Christian Sebastian Loh, Yanyan Sheng, Dirk Ifenthaler, 2015-06-13. This volume brings together research on how gameplay data in serious games may be turned into valuable analytics or actionable intelligence for performance measurement, assessment, and improvement. Chapter authors use empirical research methodologies including existing experimental and emerging conceptual frameworks from various fields such as computer science, software engineering, educational data mining, statistics, information visualization. Serious games is an emerging field where the games are created using sound learning theories and instructional design principles to maximize learning and training success. But how would stakeholders know what players have done in the game environment and if the actions' performance brings about learning? Could they be playing the game for fun, really learning with evidence of performance improvement, or simply gaming the system, i.e. finding loopholes to fake that they are making progress? This volume endeavors to answer these questions.
