Markets and People World Bank, 2020-02-10 Romania's income per capita has increased from 26 percent of the EU 28 average in 2000 to 63 percent in 2017 but this economic success rests on the wobbly foundations of unfavorable demographics weak human capital and ineffective institutions Going forward stronger competition and better human capital are critical to increasing the economy's growth potential Romanian manufacturing firms are exposed to domestic and international competition ensuring the flow of resources and market shares to more efficient players This has not been the case for services where anticompetitive regulations and direct state control often limit efficiency gains Romanian state owned enterprises do not compete on an equal footing with private sector firms distorting market outcomes and hampering the efficient allocation of resources Removal of these restrictions would have a significant positive impact on GDP growth Competitively neutral policies are needed to ensure that all enterprises public or private domestic or foreign face the same set of rules Romania's human capital accumulation proxied by the World Bank's Human Capital Index HCI is the lowest in the European Union and varies widely across counties Disparities in education outcomes remain relevant across and within regions of Romania Learning gaps in primary and secondary education persist These can be seen clearly between urban and

rural areas across regions and across social groups requiring changes both at the systems level and at the learning center level In the labor market the automation of production processes has started driving demand for higher levels of cognitive skills while jobs involving the routine application of procedural knowledge are shrinking in number A paradigm shift would require reforms in primary and secondary schooling in addition to more targeted actions to establish an effective skills development system to bolster human capital

The Making of Twenty-First-Century Richmond Thad Williamson, Julian M. Hayter, Amy L. Howard, 2024-12-02 Richmond Virginia took center stage globally in the summer of 2020 as an epicenter of antiracist protests in the wake of the police murder of George Floyd In a period of just a few weeks overwhelming public support grew for removing Richmond's Confederate monuments Activists then transformed the remaining statue of Robert E Lee into a shrine to African American resolve to the Black Lives Matter movement and to Black victims of police brutality Coming to terms with Richmond's tortured racial history however is much more difficult than toppling symbols of white supremacy This book explores these dynamics via a multidisciplinary framework of historical research public policy analysis and political analysis showing the inner dynamics of politics and governance in Richmond The authors reveal why change and progress has often been so difficult to achieve and why that matters with a focus on three fundamental policy areas education economic development and housing The result is a comprehensive assessment of urban governance in a major southern city in the early twenty first century as well as an accounting of the policy and human consequences of both its limited successes and its recurring failures

United Arab Emirates International Monetary Fund. Middle East and Central Asia Dept., 2016-07-27 This 2016 Article IV Consultation highlights that non oil economic activity in the United Arab Emirates slowed to 3.7 percent in 2015 Negative effects on overall growth were partially offset by the increase in oil production Despite the strong fiscal policy response to adjust to lower oil prices the fiscal balance turned to a deficit of 2.1 percent of GDP while the current account surplus declined to 3.3 percent of GDP Banks remained well capitalized and liquid though pressures on profitability are emerging as asset quality weakens owing to the economic slowdown and rising funding costs Economic activity is expected to moderate further in 2016 before improving over the medium term
