QUESTION 3

- 3.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 5 000 years old, near Mafeking is almost destroyed because of excessive extraction of water from the nearby Molapo river. The water is extracted for human consumption.

Peat lands like the one near Mafeking is exceptional and play an important role in storing water as well as preventing climate changes.

Dr Phil-Louis Grundling said that carbon that is 'held' or 'stored' by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 50% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The 'sponge effect' of the peat also makes it possible to store water that is then released during dry seasons.

Dr Grundling said that it might be too late to restore the peat land near Mafeking but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and frog species that lived in this peat land was also destroyed.

From: *Beeld*, 21 September 2018.

- 3.1.1 Give TWO other reasons (not mentioned in the passage) that can lead to the destruction of wetlands. (2)
- 3.1.2 Discuss reasons from the passage regarding the importance of these specific wetlands for the environment. (4)
- 3.1.3 Suggest a way in which this peat land near Mafeking can be restored. (2)

No matter how conscientious we are we carry implicit bias which quickly turns into assumptions and then labels. Labels define our interactions with and expectations of students. Labels contribute to student identity and agency. And labels can have a negative effect beyond the classroom. It is crucial then that teachers remove labels and focus on students strengths but this takes real work at an individual classroom and schoolwide scale. Removing Labels urges you to take an active approach toward disrupting the negative effects of labels and assumptions that interfere with student learning. This book offers 40 practical replicable teaching techniques all based in research and best practice that focus on building relationships restructuring classroom engagement and management and understanding the power of social and emotional learning. Suggestions for actions on an individual classroom and schoolwide level. Ready to go tools and student facing printables to use in planning and instruction. Removing Labels is more than a

collection of teaching strategies it s a commitment to providing truly responsive education that serves all children When you and your colleagues take action to prevent negative labels from taking hold the whole community benefits
