Critical Pedagogies in Physical Education, Physical Activity and Health Julie Stirrup, Oliver Hooper, 2021-07-29. Critical Pedagogies in Physical Education, Physical Activity and Health explores critical pedagogy and critical work around the body, health, and physical activity within physical education. By examining the complex relationships between policies and practice and how these are experienced by young people, it elucidates the need for critical pedagogy in contemporary times. With contributions from leading international experts in health and physical education and underpinned by a critical socio-cultural approach, the book examines how health and physical education are situated across various international contexts and the influence of policy and curriculum. It explores how health is constructed by students and teachers within these contexts, as well as how wider spaces and places beyond formal schooling influence learning around the body, health, and physical activity. Finally, it considers what progressive pedagogies might look like within health and physical education. Chapters utilise empirical work within the field to explore various topics of relevance to critical pedagogy, drawing on theoretical insights while providing practical applications and concluding with reflection points to encourage readers to consider the relevance for their own contexts. Designed to support pedagogical study in a range of contexts, this book will be of particular interest to undergraduate and postgraduate students, teachers, and researchers with an interest in physical education, physical activity, and health, and the role they play in young people's lives.
