Ringbauer,2017-08-21 This thesis uses high precision single photon experiments to shed new light on the role of reality causality and uncertainty in quantum mechanics It provides a comprehensive introduction to the current understanding of quantum foundations and details three influential experiments that significantly advance our understanding of three core aspects of this problem The first experiment demonstrates that the quantum wavefunction is part of objective reality if there is any such reality in our world The second experiment shows that quantum correlations cannot be explained in terms of cause and effect even when considering superluminal influences between measurement outcomes The final experiment in this thesis demonstrates a novel uncertainty relation for joint quantum measurements where the textbook relation does not apply *15 Years Unsolved Question Papers (2007-2021) JEE Advanced & IIT JEE* Arihant Experts,2021-12-30 15 Years
