Paper 01

JULY 7, 2022 (a.m.)

1 hour and 10 minutes

READ THE FOLLOWING INSTRUCTIONS CAREFULLY.

1. This test has 40 questions. You have 1 hour and 10 minutes to answer them.
2. Each question has four suggested answers: (A), (B), (C) and (D). Read each question carefully and then choose the correct answer.
3. On your answer sheet, find the number that matches the question you intend to answer.
4. Shade the circle with the letter, (A), (B), (C) or (D), that matches your answer for each question.

Sample Question

The sum of 4 and 5 is

- (A) 1
(B) 9
(C) 20
(D) 45

Sample Answer

The correct answer is "9", so (B) has been shaded.

5. If you want to change your answer, erase it completely before you fill in your new choice.
6. When the supervisor tells you to begin, turn the page and work as quickly and as carefully as you can.
7. If you try a question and find that you cannot answer it, go on to the next one. You may return to that question later.
8. You must **not** use calculators for this test. Rough work may be done in this booklet.

Democratic Evaluation and Democracy Donna Podems, 2017-02-01 Democratic evaluation brings a way of thinking about evaluation s role in society and in particular its role in strengthening social justice Yet the reality of applying it and what happens when it is applied particularly outside the West is unclear Set in South Africa a newly formed democracy in Southern Africa the book affords an in depth journey that immerses a reader into the realities of evaluation and its relation to democracy The book starts with the broader introductory chapters that set the scene for more detailed ones which bring thorough insights into national government local government and civil societies experience of evaluation democratic evaluation and their understanding of how it contributes to strengthening democracy or not A teaching case the book concludes by providing guiding questions that encourage reflection discussion and learning that ultimately aims to inform practice and theory

Visualisation and Epistemological Access to Mathematics Education in Southern Africa Marc Schäfer, 2023-04-27 This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well resourced and

under resourced schools in Southern Africa Drawing on classroom research conducted in the Southern African region it examines how epistemological access in a context of gross inequality can be constructively addressed by providing research based solutions and recommendations The book outlines the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education

Problem Solving in the Mathematics Classroom Ana Kuzle, Benjamin Rott, Tatjana Hodnik Cadez, 2016-06-30 Problem solving is a cornerstone of the school mathematics curricula in many countries as it is an essential part of mathematical knowledge and performance Implementation of problem solving in school mathematics is also important for meeting society's needs with respect to work school and life as well as for stimulating the interest and enthusiasm of students Countries such as Finland Germany Hungary and Slovenia have a long tradition of problem solving in school mathematics Each country has faced its own specific challenges when adopting problem solving as a constituent part of school mathematics But through this process they have gained experience and discovered chances for integrating problem solving into mathematics lessons The heart of achieving this mission lies in choosing good mathematical problems Good mathematical problems are those that are not too difficult and not too easy are interesting challenging and mathematically rich They should invite students to conjecture and to explore different strategies support extending their existing knowledge and allow for problem extension In this book the reader will find such rich mathematical problems targeting students at different school levels that can help cultivate a problem solving culture The book provides the coherence and direction from different perspectives that practitioners need when integrating problem solving into their teaching practices and using problem solving to teach mathematics We believe that the processes which accompany problem solving contribute to both the development of students mathematical reasoning and to the development of their sense of autonomy
