Writing for College and Beyond James Rovira, 2019-04-29 Writing for College and Beyond prepares students for their future college classes by covering the strategies common to most college writing. In the process of being prepared for college writing, however, students are also taught chapter by chapter how these writing skills will carry forward into their future professional lives beyond college. One of the least expensive first year writing textbooks on the market, the text isn't inflated with material that most instructors and students won't use, and several exercises encourage students to use either provided web or YouTube links as texts supporting their practice for longer assignments. If you're a first year writing instructor and would like to consider this text for your course, email the author at brightfuturespublishing@gmail.com for a desk copy.

Writing Science Joshua Schimel, 2012-01-26 This book takes an integrated approach using the principles of story structure to discuss every aspect of successful science writing, from the overall structure of a paper or proposal to individual sections, paragraphs, sentences, and words. It begins by building core arguments, analyzing why some stories are engaging and memorable while others are quickly forgotten, and proceeds to the elements of story structure, showing how the structures scientists and researchers use in papers and proposals fit into classical models. The book targets the internal structure of a paper, explaining how to write clear and professional sections, paragraphs, and sentences in a way that is clear and compelling.

The Art and Architecture of Academic Writing Patricia Prinz, Birna Arnbjörnsdóttir, 2021-08-15 This book is a bridge to confident academic writing for advanced non-native English users. It emphasizes depth over breadth through mastery of core writing competencies and strategies which apply to most academic disciplines and genres. Tailored to students in EMI programs, the content was piloted and revised during a longitudinal writing study. The innovative approach prepares students to write for the academic community through the dual lenses of Art (developing a writer's voice through choices in language style and topics) and Architecture (mastering norms of academic language genre and organization). The user-friendly text maximizes time for writing practice and production by avoiding lengthy readings. Part 1 builds skills and confidence in writing by focusing on assignments that do not require research. Part 2 applies newly mastered principles, skills, and strategies to research-based writing. Students learn to incorporate thesis, research, and evidence into a process for academic writing by following the AWARE framework: Arranging to write, Writing, Assessing, Revising, and Editing. *5 Steps to a 5 AP English Language, 2012-2013 Edition* Barbara Murphy, Estelle M.
