Spaceplane HERMES Luc van den Abeelen,2016-11-26 This is the first comprehensive book on the European Hermes program It tells the fascinating story of how Europe aimed for an independent manned spaceflight capability which was to complement US and Soviet Russian space activities In 1975 France decided to expand its plans for automated satellites for materials processing to include the development of a small 10 ton spaceplane to be launched on top of a future heavy lifting Ariane rocket This Hermes spaceplane would give Europe its own human spaceflight capability for shuttling crews between Earth and space stations The European Space Agency backed the proposal Unfortunately after detailed studies the project was cancelled in 1993 If Hermes had been introduced into service it could have become the preferred space taxi for ferrying crews to and from the International Space Station But that opportunity was lost This book provides the first look of the complete story of and reasons for the demise of this ambitious program It also gives an account which pieces of Hermes survived and are active in the 2nd decade of the 21st century This fascinating story will be a great read for space enthusiasts But it will also serve as a comprehensive documentation of an important episode in the history of manned spaceflight The Power of Knowledge Jeremy Black,2014-01-14 A thought provoking analysis of how the acquisition and utilization of information has determined the course of history over the past five centuries and shaped the world as we know it todaydiv DIV Catalog of Copyright Entries. circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the search time for new information extends the choice of search engine and location different countries affects search results the data are not indexed in search engines although the correct keywords and website were requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications
