Fleet Owner ,2006 **Primary Candidates** Mike Sutton,2015-10-08 Three politicians jockey for position in the early part of 2008 Senator Robert Fox has already secured his party's nomination but Senators Jeannette Freddo Reynolds and Thaddeus Tasman are locked in a dogfight for theirs A load of highly dangerous weapons is in transit from the Arizona manufacturer to Fort Hood Texas A very sophisticated hijack plot interrupts their journey and the President his Cabinet and the U S military have to figure out how to get them out of the wrong hands Early in his first of three tours in Vietnam Detective Hunter Morgan learned never to say the following Well things can't get any worse than this They can and do when a sniper starts shooting in Baltimore Railroad catastrophes take place on both sides of the country and terrorists strike two major American airports driving the elections news into the background temporarily until one of the primary candidates turns up missing last seen with a Secret Service Agent *Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles* National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee to Assess Fuel Economy Technologies for Medium- and Heavy-Duty Vehicles,2010-08-30 *Technologies and Approaches to Reducing the Fuel Consumption of Medium and Heavy Duty Vehicles* evaluates various technologies and methods that could improve the fuel economy of medium and heavy duty vehicles such as tractor trailers transit buses and work trucks The book also recommends approaches that federal agencies could use to regulate these vehicles fuel consumption Currently there are no fuel consumption standards for such vehicles which account for about 26 percent of the transportation fuel used in the U S The miles per gallon measure used to regulate the fuel economy of passenger cars is not appropriate for medium and heavy duty vehicles which are designed above all to carry loads efficiently Instead any regulation of medium and heavy duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers such as gallons per ton mile a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile This is called load specific fuel consumption LSFC The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types For example using advanced diesel engines in tractor trailers could lower their fuel consumption by up to 20 percent by 2020 and improved aerodynamics could yield an 11 percent reduction Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently such as garbage trucks and transit buses by as much 35 percent in the same time frame
