older data in the full record Thus the TSI climate data record CDR has two components There is the shorter but more accurate record of the TIM era and the full 33 year space based TSI measurement record Both are important and require preservation Review of NOAA Working Group Report on Maintaining the Continuation of Long Term Satellite Total Irradiance Observations evaluates NOAA s plan for mitigating the loss of total solar irradiance measurements from space given the likelihood of losing this capacity from instruments currently on the SORCE satellite in coming years and the short term experimental nature of the currently identified method of filling the data gap This report evaluates NOAA s plan for mitigating the gap in total solar irradiance data
