## DATA BAR, COLOR SCALE &amp; ICON SET FORMATS

## Data Bars

Comparing two numbers in an Excel worksheet is easy, but it's difficult to compare multiple numbers with a quick glance.

- **Data bar conditional format:** Formatting that displays a color bar in the background of a cell so you can quickly compare the relative magnitude of values in a list.
- The length of the data bar represents the size of that cell's value in relation to the other cells to which you applied the conditional format.

## Create a data bar conditional format:

- Display the **Conditional Formatting** list.
- Point to **Data Bars**.
- Click the format you want to apply.

## Types of Data Bars

## Gradient Fill formats:

- Gradually change from a solid fill at the left edge of the cell to white as the data bar goes across the cell
- Were introduced in Excel 2007

## Solid Fill formats:

- Remain a solid color for the entire length of the data bar
- Were added to Excel 2010 after user feedback indicated Gradient Fill data bars were hard to interpret.

Year	Sales

- **Automatic** (display at variable position based on negative values)
- **Cell midpoint**
- **None** (show negative values in the same direction as positive)

- Click the **Axis color** button and select a color for the axis.

- Click **OK** twice to close the dialog boxes.

## Color Scales

Color scales use gradually changing colors, called **gradients**, to represent changes in cell values.

**EX:** A color scale that displays cells with small values in white and larger values in red would fill the background of the cell that contains the smallest value with a pure white background and add bits of red to represent larger values. The cell that contains the largest value in the range would have a background of pure red.

## Create a color scale conditional format:

- Display the **Conditional Formatting** list.
- Point to **Color Scales**.
- Click the format you want to apply.

**NOTE:** You can select two-color or three-color **Color Scales**. If your data falls into two distinct ranges, use a **two-color scale**. If your data falls into three distinct ranges, such as poor, fair, and good performance, use a **three-color scale**.

Hour	Station 1	Station 2	Station 3	Station 4
1	13	92	89	79
2	58	74	87	32
3	9	14	84	15

- **Icon sets:** Collections of small graphics, or icons, that visually represent how the contents of a worksheet cell compare to a set of criteria you define.
- Quick visual summaries are perfect for dashboards and worksheets that summarize an organization's operational data in relation to metrics established by the organization.
  - Most dashboards use a variation of green, yellow, and red traffic lights to indicate good, fair, and poor performance.

## Create an icon set conditional format:

- Display the **Conditional Formatting** list.

- Point to **Icon Sets**.

If you change the **Value** and comparison operators and then change the type to **Number**, Excel will reset the comparison operator and contents of the **Value** box.

- Click the first comparison operator list box's down arrow.
