agriculture 1880 1910 It highlights their vigorous responses to the violence of revolution their increased mobility and their interaction with state reforms in the period from 1910 to 1940 The final essays focus on changing gender relations in the countryside under the impact of rapid urbanization and industrialization since 1940 Because histories of Latin American women have heretofore neglected rural areas this volume will serve as a touchstone for all who would better understand women's lives in a region of increasing international economic importance Women of the Mexican Countryside demonstrates that contrary to the peasant stereotype these women have accepted complex roles to meet constantly changing situations
