Program need and description

Data from the Centers for Disease Control (CDC) and Prevention show that American youth are at risk for a multitude of behaviors that are harmful to their health and well-being. These include alcohol, tobacco, e-cigarettes, marijuana, prescription opioid misuse and other illicit drug use, physical inactivity, unhealthy eating, lack of sleep and uncontrolled stress.

Research also indicates that the majority of US youth experience two or more co-existing risk behaviors, and over a third three or more risk behaviors. Together, multiple risk habits interact to compound the pain, suffering and sadness youth and their families experience by increasing the likelihood of injury, illness, and personal and social problems, while hindering positive development of youth.
