Carlson, Melissa A. Birkett, 2020-06-15 This title is a Pearson Global Edition The Editorial team at Pearson has worked closely with educators around the world to include content which is especially relevant to students outside the United States For courses in Physiological Psychology or Biopsychology A streamlined overview of **The Ecological Brain** Luis H. Favela, 2023-12-22 The Ecological Brain is the first book of its kind using complexity science to integrate the seemingly disparate fields of ecological psychology and neuroscience The book develops a unique framework for unifying investigations and explanations of mind that span brain body and environment the NeuroEcological Nexus Theory NExT Beginning with an introduction to the history of the fields the author provides an assessment of why ecological psychology and neuroscience are commonly viewed as irreconcilable methods for investigating and explaining cognition intelligent behavior and the systems that realize them The book then progresses to its central aim presenting a unified

investigative and explanatory framework offering concepts methods and theories applicable across neural and ecological scales of investigation By combining the core principles of ecological psychology neural population dynamics and synergetics under a unified complexity science approach NExT offers a compressive investigative framework to explain and understand neural bodily and environmental contributions to perception action and other forms of intelligent behavior and thought The book progresses the conversation around the role of brains in ecological psychology as well as bodies and environments in neuroscience It is essential reading for all students of ecological psychology perception cognitive sciences and neuroscience as well as anyone interested in the history and philosophy of the brain mind sciences and their state of the art methods and theories

The Sentient Archive Bill Bissell, Linda Caruso Haviland, 2018-06-26 The Sentient Archive gathers the work of scholars and practitioners in dance performance science and the visual arts Its twenty eight rich and challenging essays cross boundaries within and between disciplines and illustrate how the body serves as a repository for knowledge Contributors include Nancy Goldner Marcia B Siegel Jenn Joy Alain Platel Catherine J Stevens Meg Stuart Andr Lepecki Ralph Lemon and other notable scholars and artists Hardcover is un jacketed

Unraveling Matthew J. Wolf-Meyer, 2020-10-20 Developing a cybernetic model of subjectivity and personhood that honors disability experiences to reconceptualize the category of the human Twentieth century neuroscience fixed the brain as the basis of consciousness the self identity individuality even life itself obscuring the fundamental relationships between bodies and the worlds that they inhabit In *Unraveling* Matthew J Wolf Meyer draws on narratives of family and individual experiences with neurological disorders paired with texts by neuroscientists and psychiatrists to decenter the brain and expose the ableist biases in the dominant thinking about personhood *Unraveling* articulates a novel cybernetic theory of subjectivity in which the nervous system is connected to the world it inhabits rather than being walled off inside the body moving beyond neuroscientific symbolic and materialist approaches to the self to focus instead on such concepts as animation modularity and facilitation It does so through close readings of memoirs by individuals who lost their hearing or developed trauma induced aphasia as well as family members of people diagnosed as autistic texts that rethink modes of subjectivity through experiences with communication caregiving and the demands of everyday life Arguing for a radical antinormative bioethics *Unraveling* shifts the discourse on neurological disorders from such value laden concepts as quality of life to develop an inclusive model of personhood that honors disability experiences and reconceptualizes the category of the human in all of its social technological and environmental contexts

Behavioral Neuroscience for the Human Services Harriette C. Johnson, 2014 This text fuses scientific integrity with conversational humorous presentation of neuroscience knowledge for human services Knowledge conveyed is essential for practice with mental health addiction and developmental challenges violence family relationships

Fine Art and Perceptual Neuroscience Paul Hackett, 2014-01-10 Over the past decade the integration of psychology and fine art has sparked growing academic interest among researchers of these disciplines The author both a

psychologist and artist offers up a unique merger and perspective of these fields Through the production of fine art which is directly informed by neuroscientific and optical processes this volume aims to fill a gap in the literature and understanding of the creation and perception of the grid image created as a work of art The grid image is employed for reasons discussed in the text to illustrate more general processes associated with the integration of vision visual distortion and painting Existing at the intersection of perceptual neuroscience psychology fine art and art history this volume concerns the act of painting and the process of looking More specifically the book examines vision and the effects of visual impairment and how these can be interpreted through painting within a theoretical framework of visual neuroscience *Lifespan Development in Context*

Tara L. Kuther, 2018-01-02 Award winning author Tara L Kuther presents *Lifespan Development in Context* a topically organized version of her bestselling *Lifespan Development* text that provides a panoramic view of the many influences that shape human development Kuther's student friendly narrative guides the reader through immersive video cases and real world examples to illustrate how the places sociocultural environments and ways in which we are raised influence who we become and how we grow and change throughout our lives Three core themes resonate throughout each chapter the centrality of context the importance of research and the value of applied developmental science Foundational theories and classic studies are combined with contemporary research and culturally diverse perspectives for a modern introduction to the field that is both comprehensive and concise Visual overviews case studies and critical thinking questions encourage self reflection and class discussion ensuring students have the tools they need to apply course concepts to their lives and future careers [Human Choice in International Law](#) Anna Spain Bradley, 2021-07-22 *Human Choice in International Law* is an exploration of human choice in international legal and political decision making This book investigates the neurobiology of how people choose and the history of how personal choice has affected decisions about international peace and security It charts important decision moments in international law about genocide intervention into armed conflict and nuclear weapons at the central institutions of the international legal order Professor Spain Bradley analyzes the role that particular individuals serving as international judges or Security Council representatives play in shaping decision outcomes and then applies insights from neuroscience to assert the importance of analyzing how cognitive processes such as empathy emotion and bias can influence such decisionmakers Drawing upon historical accounts and personal interviews this book reveals the beauty and struggle of human influences that shape the creation and practice of international law
