Or Lives, Critical and Historical, of the Most Eminent Persons of All Ages, Countries, Conditions, and Professions, Arranged According to Alphabetical Order John Aikin, 1799 **A Cultural History of Medical Vitalism in Enlightenment**

Montpellier Elizabeth A. Williams, 2017-03-02 One of the key themes of the Enlightenment was the search for universal laws and truths that would help illuminate the workings of the universe. It is in such attitudes that we trace the origins of modern science and medicine. However, not all eighteenth-century scientists and physicians believed that such universal laws could be found, particularly in relation to the differences between living and inanimate matter. From the 1740s, physicians working in the University of Medicine of Montpellier began to contest Descartes's dualist concept of the body machine that was being championed by leading Parisian medical mechanists. In place of the body machine perspective that sought laws universally valid for all phenomena, the vitalists postulated a distinction between living and other matter, offering a holistic understanding of the physical-moral relation in place of mind-body dualism. Their medicine was not based on mathematics and the unity of the sciences but on observation of the individual patient and the harmonious activities of the body economy. Vitalists believed that illness was a result of disharmony in this body economy, which could only be remedied on an individual level depending on the patient's own natural limitations. The limitations were established by a myriad of factors such as sex, class, age, temperament, region, and race, which negated the use of a single universal treatment for a particular ailment. Ultimately, Montpellier medicine was eclipsed by that of Paris, a development linked to the dynamics of the Enlightenment as a movement bent on cultural centralisation, acquiring a reputation as a kind of anti-science of the exotic and the mad. Given the long-standing Paris-centrism of French cultural history, Montpellier vitalism has never been accorded the attention it deserves by historians. This study repairs that neglect. *A Universal Biography* William A. Beckett, 1836 Biography Charles Knight, 1872 **The History of Pain** Roselyne Rey, 1995 This text draws on multidisciplinary sources to explore the concept of pain as it has been seen by different cultures over the course of history. It highlights the transformation in humanity's relationship to pain and chronicles the progress made in its understanding and treatment. *The Southern and Western Literary Messenger and Review*, 1847 **Bibliography of the History of Medicine**,
