Geography Paper 2 2013 Nov:

The Making of a World City Greg Clark, 2014-10-16 After two decades of evolution and transformation London had become one of the most open and cosmopolitan cities in the world The success of the 2012 Olympics set a high water mark in the visible success of the city while its influence and soft power increased in the global systems of trade capital culture knowledge and communications The Making of a World City London 1991 2021 sets out in clear detail both the catalysts that have enabled London to succeed and also the qualities and underlying values that are at play London's openness and self confidence its inventiveness influence and its entrepreneurial zeal London's organic unplanned incremental character without a ruling design code or guiding master plan proves to be more flexible than any planned city can be Cities are high on national and regional agendas as we all try to understand the impact of global urbanisation and the re urbanisation of the developed world If we can explain London's successes and her remaining challenges we can unlock a better understanding of how cities succeed

Emotional States Eleanor Jupp, Jessica Pykett, Fiona M. Smith, 2016-10-14 What is the political allure value and currency of emotions within contemporary cultures of governance What does it mean to govern more humanely Since the emergence of an emotional turn in human geography over the last decade the notion that our emotions matter in understanding an array of social practices spatial formations and aspects of everyday life is no longer seen as controversial This book brings recent developments in emotional geography into dialogue with social policy concerns and contemporary issues of governance It sets the intellectual scene for research into the geographical dimensions of the emotionalized states of the citizen policy maker and public service worker and highlights new research on the emotional forms of governance which now characterise public life An international range of empirical field studies are used to examine issues of regulation modification governance and potential manipulation of emotional affects professional and personal identities and political technologies Contributors provide analysis of the role of emotional entanglements in policy strategy policy implementation service delivery citizenship and participation as well as considering the emotional nature of the research process itself It will be of interest to researchers and students within social policy human geography politics and related disciplines

Distance, Rating Systems and Enterprise Finance Franz Flögel, 2018-07-27 In response to the credit crunch during the global financial crisis of 2007 2008 many have called for the re establishment of regional banks in the UK and elsewhere In this context Germany's regional banking system with its more than 1 400 small and regional savings banks and cooperative banks is viewed as a role model in the financing of small and medium sized enterprises SMEs However in line with the death of distance debate the universal application of ICT based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs calling into question the key advantage of regional banks Utilising novel ethnographic findings from full time participant observation and interviews this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide

operating commercial banks in Germany The ethnographic insights are contextualised by concise description of the three pillar German banking system covering bank regulation structural and geographical developments and enterprise finance Furthermore the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the ontological foundation of new realism Ethnographic findings reveal varying distances of credit granting depending on the rating results i e large banks allocate considerable credit granting authority to local staff and therefore challenge the proximity advantages of regional banks Nevertheless by presenting case studies of lending to SMEs the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected

Re-Mapping Archaeology Mark Gillings, Piraye Hacıgüzeller, Gary Lock, 2018-07-27 Maps have always been a fundamental tool in archaeological practice and their prominence and variety have increased along with a growing range of digital technologies used to collect visualise query and analyse spatial data However unlike in other disciplines the development of archaeological cartographical critique has been surprisingly slow a missed opportunity given that archaeology with its vast and multifaceted experience with space and maps can significantly contribute to the field of critical mapping Re mapping Archaeology thinks through cartographic challenges in archaeology and critiques the existing mapping traditions used in the social sciences and humanities especially since the 1990s It provides a unique archaeological perspective on cartographic theory and innovatively pulls together a wide range of mapping practices applicable to archaeology and other disciplines This volume will be suitable for undergraduate and postgraduate students as well as for established researchers in archaeology geography anthropology history landscape studies ethnology and sociology

The Uneven Offshore World Justin Robertson, Michael Tyralla, 2022-03-24

Informed by world systems analysis this book examines the shifting patterns of accommodation and resistance to the offshore world with a particular focus on Mauritius as a critical but underappreciated offshore node mediating foreign investment into India and Africa Drawing on a large pool of financial data and elite interviews the authors present the first detailed comparative study of the

Mauritius India and Mauritius Africa offshore relationships These relationships serve as indicative test cases of the contemporary global tax reform agenda and its promise to rein in offshore finance Whereas India s economic power and multilateral track record have enabled it to actively shape this agenda and implement it in a robust manner most African countries have found themselves either unable to meet its stringent criteria or unwilling to do so out of fear that it might discourage investment Its impact on offshore financial centers has likewise been limited A few of the least sophisticated ones appear to have fallen by the wayside but the rest have either remained largely unaffected or like Mauritius succeeded in consolidating their operations and surviving the current round of regulatory headwinds The findings suggest that the contemporary global tax reform agenda has thus far not only failed to make good on its promise but also actually reinforced numerous existing power hierarchies

The Uneven Offshore World is written in an accessible style and aimed at readers without specialized knowledge of tax issues

The Moral Geographies of Children, Young People and Food J. Pike,P. Kelly,2014-11-25 This book takes Jamie Oliver s campaign for better school meals as a starting point for thinking about morally charged concerns relating to young people s nutrition health and well being parenting and public health crises such as obesity The authors show how these debates are always about the moral project of the self Government Gazette ,1902
