Paul W. Bennett

Grade 1march 2014 Maths Memorandum:

The State of the System Paul W. Bennett, 2020-09-23 Over the last fifty years Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage. Crying out for democratic school level reform, the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents, further out of touch with communities and surprisingly unresponsive to classroom teachers. Exploring the nature of the Canadian education order in all its dimensions, *The State of the System* explains how public schools came to be so bureaucratic, confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform. Going beyond a diagnosis of the stresses, strains and ills present in the system, Paul Bennett proposes a bold plan to re-engineer schools on a more human scale as the first step in truly reforming public education. In place of school consolidation and managerialism, one size fits all uniformity, limited school choice and the success for all curriculum, Bennett advocates for a new set of priorities: decentralize school governance, deprogram education ministries and school districts, listen to parents and teachers and revitalize local education democracy. Tackling the thorny issues besetting contemporary school systems in Canada, *The State of the System* issues a clarion call for more responsive, engaged and accountable public schools.
