Epilogue **Life in the Age of Drone Warfare** Lisa Parks, Caren Kaplan, 2017-10-19 This volume's contributors offer a new critical language through which to explore and assess the historical juridical geopolitical and cultural dimensions of drone technology and warfare. They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power. Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator. The contributors also explore drone warfare in relation to sovereignty governance and social difference, provide accounts of the relationships between drone technologies and modes of perception and mediation, and theorize drones' relation to biopolitics, robotics, automation, and art. Interdisciplinary and timely, *Life in the Age of Drone Warfare* extends the critical study of drones while expanding the public discussion of one of our era's most ubiquitous instruments of war. Contributors: Peter Asaro, Brandon Wayne Bryant, Katherine Chandler, Jordan Crandall, Ricardo Dominguez, Derek Gregory, Inderpal Grewal, Lisa Hajjar, Caren Kaplan, Andrea Miller, Anjali Nath, Jeremy Packer, Lisa Parks, Joshua Reeves, Thomas Stubblefield, Madiha Tahir. Official Gazette of the United States Patent and Trademark Office, 1999 **After the Education Wars** Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers. *After the Education Wars* helps us to see a better way forward. Cathy N. Davidson, *The New York Times Book Review*. *After the Education Wars* is an important book that points the way to genuine reform. Diane Ravitch, author of *Reign of Error* and *The Death and Life of the Great American School System*. A bestselling business journalist critiques the top-down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler, more democratic entrepreneurialism. In an entirely fresh take on school reform, business journalist and bestselling author Andrea Gabor argues that Bill Gates, Eli Broad, and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world. *After the Education Wars* explains how the market-based measures and carrot-and-stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty-first-century companies as well. These rich, detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up. Lessons also learned from both the open-source software and quality movements. The good news is that solutions born of this philosophy are all around us from Brockton, Massachusetts, where the state's once-failing largest high school now sends most graduates to college, to

Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools **Long-Range Dependent Processes: Theory and Applications** Ming Li, Carlo Cattani, 2022-12-05
