

Systems Clues in Everyday Language

by Leslie Smith, University

How many times have you heard someone say, "This is spiraling out of control" or "This is a rollercoaster"? Or even newspaper articles describe the "boom and bust" cycle of a particular market segment or feature about how the bundling of small procedural rules in business and government can "snowball" into big snowballs. When people use these kinds of phrases, they often intuitively give hints about the underlying *behavior* of complex systems. By listening and looking for such "systems clues," we can gain insight into how systems operate on a fundamental level—and start to think about the most effective ways to implement change.

Winless and Virtuous Cycles: Reinforcing Processes

The expression "virtuous cycle," for example, suggests rapidly building momentum in a positive direction.

- An instructor might use this phrase to describe how great test results could lead to a perception loss of market share, as customers come to question a product's quality.
- A teacher might use the term to describe a student whose test achievement and peer performance reinforce each other in a downward spiral.
- Many scientists have described the virtuous cycle that occurs when a slight rise in atmospheric temperature begins to melt ice in the polar regions; the now bare ground absorbs more heat, causing even more ice to melt.

In systems thinking terms, both virtuous and vicious cycles are reinforcing feedback processes, in which a change builds on itself over time.

Rollercoaster or Yo-Yo Behavior: Balancing Processes

The expression "rollercoaster" is often used to describe behavior that swings in one direction and then another over time.

- Dieticians talk about "yo-yo dieting," the tendency for people who have lost weight to gain it back again, prompting another round of dieting and weight gain.
- Business writers refer to the "rollercoaster economy" as a way to remind readers that, during good times, they need to prepare for the inevitable downturn.
- Hospital administrators describe the processes they experience around supply and demand of medical staff. For example, when demand for doctors goes up, more people go to medical school, leading to an oversupply of doctors. When physicians find it difficult to get jobs, fewer people go into the profession, and hospitals experience staffing shortages.

These are balancing feedback processes, in which a set of interactions dampen or return a system back to a state of equilibrium.

What other words and sayings offer clues to complex systems behavior?

Sleuthing the Bible John Kaltner, Steven L. McKenzie, 2019-06-18 Why is there crime scene tape on my Bible Elementary my dear reader There is an element of detective work to biblical scholarship that entails sniffing out and interpreting clues that often escape the notice of readers John Kaltner and Steven L McKenzie introduce the art of sleuthing the Bible providing the necessary training to hunt for clues and piece them together to understand the larger picture Sleuthing the Bible helps answer questions that occur during thoughtful examination of the Bible and provides exercises enabling readers to work through biblical passages on their own Kaltner and McKenzie analyze two kinds of clues 1 Smoking Guns those that are obvious upon any close reading of biblical texts and 2 Dusting for Prints those that are more subtle or hidden from nonspecialists because of their unfamiliarity with the languages culture and larger content of the Bible Written in a jargon free and accessible style Sleuthing the Bible is an ideal resource for anyone who wants to dig deeper into the biblical text *Manpower Development: Education and Training. Christianity Is their approach warranted Or is it a fundamental distortion of the gospel The present volume seeks to set out the case that Christian Reconstructionism is not a legitimate variation of Christian doctrine but rather a serious misunderstanding of the gospel attested in Holy Scripture First an attempt is made to look at the basic ideas of Christian Reconstructionism Rather than focusing on names and dates the focus is on the set of ideas that characterize this view of Christianity Second a response is given to each of the main ideas The response makes use of traditional Protestant Roman Catholic and Eastern Orthodox doctrine but it is based primarily on careful exegesis of Scripture The ultimate question is if Christian Reconstructionism is grounded in the Bible or in a political ideology foreign to Scripture An epilogue briefly points to a different way of seeing Christian involvement in contemporary global society

The Failed Promise of the American High School, 1890-1995 David L. Angus, Jeffrey Mirel, 1999 This provocative new study of the American high school examines the historical debates about curriculum policy and also traces changes in the institution itself as evidenced by what students actually studied Contrary to conventional accounts the authors argue that beginning in the 1930s American high schools shifted from institutions primarily concerned with academic and vocational education to institutions mainly focused on custodial care of adolescents Claiming that these changes reflected educators racial class and gender biases the authors offer original suggestions for policy adjustments that may lead to greater educational equality for our ever growing and ever more diverse population of students
