achieve true health Ben offers a three step plan understanding the science unveiling the fat loss options available choosing what habits work for you Let s say goodbye to specific diet plans and products and hello to implementing sustainable fat loss habits based on our own personal preferences

**The 5 Disciplines of Inclusive Leaders** Andrés T. Tapia, Alina Polonskaia, 2020-10-20 Diversity initiatives are falling short. This book shows leaders how to develop the skills needed to build sustainably inclusive organizations using a tested research based model developed by the global organizational consulting firm Korn Ferry. According to the journal Human Resource Management companies are spending over 8 billion a year on diversity programs. Yet today the senior leadership teams at Fortune 500 companies are far from mirroring the diversity of its workforce and its customers. Andrés Tapia and Alina Polonskaia senior leaders at Korn Ferry argue that to build sustainable diversity and inclusion organizations need to have inclusive leaders at all levels. In this book Tapia and Polonskaia draw on Korn Ferry's massive database of 3 million leadership assessments to reveal the essential qualities of inclusive leaders. They discuss the personality traits these leaders share and detail how to develop what they call the five disciplines of inclusive leadership: building interpersonal trust, integrating diverse perspectives, optimizing talent, applying an adaptive mindset, and achieving transformation. Tapia and Polonskaia also outline the competencies behind each discipline, describe individual and organizational exemplars of inclusive leadership, and show how the five disciplines enable leaders to unleash the power of all people and to build both structurally and behaviorally inclusive organizations. This book will help leaders foster the skills to deal with today's complex challenges and create a more inclusive, sustainable, and prosperous future for all of us.

**Digital Food Cultures** Deborah Lupton, Zeena Feldman, 2020-02-25 This book explores the interrelations between food technology and knowledge sharing practices in producing digital food cultures. Digital Food Cultures adopts an innovative approach to examine representations and practices related to food across a variety of digital media: blogs and vlogs, video blogs, Facebook, Instagram, YouTube, technology developers, promotional media, online discussion forums, and self-tracking apps and devices. The book emphasises the diversity of food cultures available on the internet and other digital media, from those celebrating unrestrained indulgence in food to those advocating very specialised diets requiring intense commitment and focus. While most of the digital media and devices discussed in the book are available and used by people across the world, the authors offer valuable insights into how these global technologies are incorporated into everyday lives in very specific geographical contexts. This book offers a novel contribution to the rapidly emerging area of digital food studies and provides a framework for understanding contemporary practices related to food production and consumption internationally.
