Evolution's Way Todd F. Ekof,2020-04-01 We are living in a time of exponential changes due to the rapid evolution of technology far outpacing that of our biology Extraordinary as they seem however these changes are expressions of the natural evolutionary processes that have been occurring since the Universe began Evolution s Way shows us how this all pervasive force shapes and moves the Universe and everything within it from the first stars to the first cells from humans to their machines toward increasingly greater states of complexity awareness and unity As nature s toolmakers moreover humanity and its machines have brought the entire Universe to a sudden point of transformation that s about to change everything Humans like all creatures are creatures of habit which means sudden changes can feel threatening to us But Evolution s Way helps sooth our nerves by elucidating the spiritual dimensions of evolution while reminding us we too are an intricate and beautiful part of nature s drive toward transcendence

Being Called to Care ,1994-03-31 Although the major part of this book focuses on rethinking nursing education the essence of this book the notion of being called to care is of relevance to all human service professionals who are responsible for ministering to the needs of others The authors set the context for what it means to be called to care and explore ways of responding to a call The three themes of vulnerability authenticity and structure are presented as foundational Using a hermeneutic interpretive approach to inquiry insights are presented to uncover ways of conceptualizing and practicing curriculum through processes that join persons together in dialogue and reflection

Conrad Daniel R. Schwarz,1982-06-18 Thinking the Event François Raffoul,2020-05-05 The author of *The Origins of Responsibility* presents a major contribution to philosophical scholarship on the very idea of the event Edward S Casey author of *The World on Edge* In *Thinking the Event* continental philosopher Fran ois Raffoul explores the question of what constitutes an event as an event not what happens or why it happens but what happening means If it s true that nothing happens without a reason as Leibniz famously posited then does this principle of reason have a reason Bringing together philosophical insights from Martin Heidegger Jacques Derrida Jean Luc Nancy and Jean Luc Marion Raffoul shows how the event in its disruptive unpredictability always exceeds causality subjectivity and reason He then goes on to examine the inappropriability of this pure event and how this inappropriability may inform ethical and political considerations In the wake of the exhaustion of traditional metaphysics the notion of the event comes to the fore with key implications for philosophy ontology ethics and theories of selfhood Raffoul s *Thinking the Event* is essential reading on this fascinating topic
