MASTERING MOVEMENT: A NEW APPROACH TO COACHING AND PRACTICING SPORTS SKILLS Antony Zef,2023 It was about five years ago walking around my local park on a beautiful Saturday morning when I suddenly realized something was dreadfully wrong On the soccer fields kids from a local club were waiting in lines to dribble a ball around a set of cones On another field players from a nearby high school football team were waiting in line to run through a set of tires On the baseball diamond batters were hitting balls off tees On the tennis court the instructor was tossing the ball underhand to a player attempting to repeat the same forehand stroke over and over into an empty court Soccer football baseball and tennis are incredibly exciting dynamic activities defined by their interpersonal actions attacker vs defender pitcher vs hitter server vs receiver It seems like almost every week we see a highlight of an athlete from one of these sports doing something new and unexpected So why then do we practice them in such a static isolated and choreographed manner If an alien from another planet came and watched would they think the goal of sports here on earth was to defeat inanimate pieces of rubber Why do we insist on teaching movement skills this way From golf lessons to soccer practice to learning to do pottery the dominant view has been that we become skillful by trying to repeat the one correct technique given to us by a coach or an instructor over and over until we get it right In baseball tennis and golf we learn THE way to swing In soccer and basketball we learn THE correct way to dribble a ball In pottery we learn THE way to position our hands We reduce these creative interactive dynamic activities down to dull isolated fundamentals so that they can be drilled and mastered For a long time we have assumed that decomposition and repetition rule the day if you want to be an elite performer In this book I want to introduce you to a revolution in the way we think about learning to move and act in the world A radical change *The Archaeology of Human Bones* Simon Mays,2021-03-01 The Archaeology of Human Bones provides an up to date account of the analysis of human skeletal remains from archaeological sites introducing students to the anatomy of bones and teeth and

the nature of the burial record Drawing from studies around the world this book illustrates how the scientific study of human remains can shed light upon important archaeological and historical questions This new edition reflects the latest developments in scientific techniques and their application to burial archaeology Current scientific methods are explained alongside a critical consideration of their strengths and weaknesses The book has also been thoroughly revised to reflect changes in the ways in which scientific studies of human remains have influenced our understanding of the past and has been updated to reflect developments in ethical debates that surround the treatment of human remains There is now a separate chapter devoted to archaeological fieldwork on burial grounds and the chapters on DNA and ethics have been completely rewritten This edition of *The Archaeology of Human Bones* provides not only a more up to date but also a more comprehensive overview of this crucial area of archaeology Written in a clear style with technical jargon kept to a minimum it continues to be a key work for archaeology students
