Changing Our Mind David P. Gushee, 2017-05-31 Every generation has its hot button issue writes David P Gushee For us it's the LGBT issue In *Changing Our Mind* Gushee takes the reader along his personal and theological journey as he changes his mind about gay lesbian bisexual and transgender inclusion in the Church With 19 books to his name Gushee is no stranger to the public arena He is the author of the Evangelical Declaration Against Torture and drafted the Evangelical Climate Initiative For

decades now David Gushee has earned the reputation as America's leading evangelical ethicist. In this book he admits that he has been wrong on the LGBT issue, writes Brian D McLaren, author and theologian. In the definitive third edition of this book David Gushee issues a scholarly response to his critics. Brian D McLaren says it best: Not only is David Gushee's work deep, thoughtful, and brilliant, and not only is David philosophically and theologically careful and astute, he is also refreshingly clear and understandable by common people who know neither philosophical nor theological mumbo jumbo. At the Margins D. Gareth Jones, 2022-09-21. As a Christian who has functioned at the interface of biomedical science and faith for the whole of his professional life, Gareth Jones is aware of the tensions and misunderstandings that frequently arise both inside and outside the church. In this book he argues that Christians should not underestimate the importance of scientific contributions to an understanding of God's world. He works this out by reference to his own experiences in approaching a number of contentious topics. These include the use of embryos in reproductive technology research, the place of vaccines in combatting viral pandemics like COVID-19, and understanding the gender debate. Other examples he uses are the treatment of a genetic condition like cystic fibrosis and the importance of using only donated bodies for teaching and research in anatomy. In working at these borderlands, he recognizes that the best of biomedical science brings glory to God and enhances human existence. All these areas are transformed by applying Christian values such as the dignity and equality of human beings. Over the years, he has learned how to be comfortable working in these borderlands, even as they raise questions that trouble many within both society and the churches. *Becoming Antifragile* Dr Paige Williams, 2022-03-24. We need to turn disruption and uncertainty to our advantage. We need to Become Antifragile. Using evidence from neuroscience, psychology, and lived leadership experience, this book offers leaders practical guiding principles to Embrace change rather than resist it. Lean into challenge rather than avoid it. Learn to thrive when times get tough. The future is more uncertain than ever. Many leaders are struggling. With this book, you won't be one of them. **The Politics of Conformity in Japan** Yukiko Nishikawa, 2025-06-13. This book explores the concept of conformity pressure or *d ch atsuryoku* in Japanese society and unveils its effects on law, politics, and business, and vice versa. Conformity pressure is explored from a unique perspective, expanding on traditional psychological analyses by highlighting how conformity pressure acts as a force which interacts not only with psychological dynamics but also with formal and informal economic, legal, and political influences. This book also demonstrates how conformity pressure can be comprehended as a societal force identifiable through socio-political analysis, in addition to traditional psychological analyses. Through such examinations, it reveals conformity pressure as not merely a by-product of Japanese cultural uniqueness but also as an integral component of socio-political dynamics crucial to understanding the

essence of Japanese politics law and society Employing an interdisciplinary approach and incorporating aspects of economic political sociological and psychological analysis this book will be a valuable resource to students and scholars of politics and sociology particularly Japanese as well as social and political psychology

The Rise of Trump Matthew C MacWilliams, 2016-09-28 The ascendance of Donald Trump to the presidential candidacy of the Republican Party has been both remarkable and to most commentators unlikely In *The Rise of Trump America's Authoritarian Spring* Matthew MacWilliams argues that Trump's rapid rise through a bewildered Republican Party hierarchy is no anomaly rather MacWilliams argues it is the most recent expression of a long standing theme in American political life the tendency and temptation to an ascriptive politics a political view that builds its basic case on ascribing to any relatively disempowered group whether defined by race ethnicity gender sexual orientation religious belief or other identifying category a certain set of qualities that justify discriminatory treatment The ascriptive tradition in American politics though longstanding has generally been kept to a relatively small minority a minority whose rights perhaps paradoxically have been protected by the principles of Madisonian democracy even though central to its worldview is the need and urgency of limiting the rights of some It has found champions in years past in such figures as Andrew Jackson Huey Long Joseph McCarthy and Pat Buchanan But in Donald Trump this tradition has found a significant new voice one emboldened by deeper shifts in the American political landscape Trump's swift and unsettling rise to the pinnacle of presidential politics may point toward the emergence of more significant and substantial questions about the future course of a democratic government committed to principles of equality and the freedom of expression association and conscience

The Realities of 'Reality' - Part III: Impacts of Speed and Time Optimization on Reality Fritz Dufour, MBA, DESS, 2019-08-28

The main theme of this book is the impacts of speed and time optimization on reality or more precisely on our modern society But first it sets the background by exploring the physics behind the concepts of speed and time how they came about how we became aware of them and how did the new world of speed emerge and why does it seem to be inescapable It explores the speed of light and the speed of sound by linking them to our environment It introduces the notion of Arrow of time or entropy which grows from the past to the present is expected to keep growing in the future and hypothesizes that this is perhaps why our craving for speed and time optimization is here to stay with no end in sight An important point discussed is that because of memories and experiences people may choose to live either in the past present or future which leads to the notions of presentism and eternalism The book argues that while for presentists only the present is real for eternalists both the past present and future are equally real The book makes the case about speed and time optimization as a legacy of modernity by laying out the differences between modernism modernization and modernity itself It shows how modernity is all about the now or the present rather than the past and how as such it's all about the new So then the changes that are now happening in our modern world can be traced back to a segment of history that dates back to the beginning of modernity that is which began with the Protestant Reformation and is now rapidly approaching closure in the world of today's extreme finance It argues about the technological implications of speed and time in the 21st century It shows how technology has become an integral part of human existence and that it is inconceivable one can even think of escaping it This Part III of the series shows the link between high speed trading and faster connectivity and faster computers It shows how thanks to the Internet information became freely accessible and is spreading faster and faster It shows how supercomputers not only allow people to address the biggest and most complex problems they also allow people to solve problems faster even those that could fit on servers or clusters of PCs This rapid time to solution is critical in some aspects of emergency preparedness and national defense where the solutions produced are only valuable if they can be acted on in a timely manner Finally the social and psychological implications of speed and time in the 21st century are also addressed by considering the upside and the downside of moving fast meaning leading a fast paced life The argument presented in the book is based on the analysis and the importance of stress in our daily lives and also explains the notion of chronobiology Our biological clocks drive our circadian rhythms An interesting point is that blind people may not perceive time the same way as the non blind Furthermore the book shows how we perceive time differently as we age compared to when we were young It also makes the case for the perception of time in dreams and in real life Speed and time optimization may be deceiving according to this Part III of the series This can be proven by questions such as 1 Is going over the speed limit really worth it

and 2 Is the saying Slow down to go faster a paradox Minds, Brains, Souls and Gods Malcolm Jeeves,2013-05-14 In this hypothetical correspondence Malcolm Jeeves urges Christian students to enter the brave new world of neuroscience ready to have their faith examined and their experiences of God put to the test When we do this he argues being mindful of oversimplifications as we go the integration of Christianity and psychology becomes possible **The Impact of Watching Violent Television Programs on Secondary School Children in Tanzania** Watson Lupogo Masiba,2016-06-14 Violent television programs are highly preferred by children They stimulate their emotions and increase curiosity about violence related issues This means that watching violent television programs has an impact upon their way of perceiving the world around them and acting in response to it This study investigated the impacts of watching violent television programs on secondary school children in Tanzania The specific objectives were to examine children s accessibility to the TV ascertain the types of violent TV programs and the time children spend watching them determine the ways in which watching violent TV programs affects their academic performance find out the impact of watching violent TV programs on their discipline and examine the role of parents in addressing the impacts of watching violent TV programs upon their children Results indicate that most secondary school children watch violent TV programs at home in the sitting rooms They spend an average of three hours per day on weekdays and seven and half hours on weekends watching movies music drama and informational programs that were identified as the most violent ones Obviously spending lots of time watching violent TV programs decreases children s academic performance and discipline This book is important because it discusses the parents role in discouraging and limiting children from watching violent TV programs and choosing appropriate TV programs for them
