Beyond the Saga of Rocket Science
Walter Sierra, 2019-10-03 In Space to Stay the third book in the spell binding The Saga of Rocket Science series gives a thorough expos of the U S Apollo and Space Shuttle programs You will be there as Gus Grissom Ed White and Roger Chaffee perish and get incinerated inside their locked Apollo 1 capsule when Jim Lovell Jack Swigert and Fred Haise didn't know if they would make it back alive aboard a freezing lunar module on Apollo 13 as Neil and Buzz experienced the euphoria of being the first humans to land on the Moon while Mike Collins in lunar orbit and an anxious world looked on You'll see the same panoramic vistas of the lunar landscape and the beautiful blue marble we call Earth as the astronauts saw You are taken inside the Challenger Space Shuttle as it caught fire and disintegrated in flight What seven brave astronauts felt like as they plunged to their deaths in a basically intact crew cockpit You'll understand exactly what failed and how it failed on both the Challenger and the ill fated Columbia space shuttles and why another seven astronauts aboard the Columbia felt no pain despite their grisly annihilation during reentry

Applied Olfactory Cognition Gesualdo M Zucco, Benoist Schaal, Mats Olsson, Ilona Croy, 2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long thought that the human nose might be able to discriminate somewhere in the order of 10 000 different odourants The recent finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as a further corrective for anyone who should hold the view that olfaction is unimportant in human affairs The papers presented in this ebook carefully collated and overseen by Aldo Zucco Benoist Schaal Mats Olsson and Ilona Croy showcase a large number of quite different reasons for studying the applied side of olfaction and indeed human olfaction in general The 23 contributions presented here cover a broad range of topics which illustrate contemporary interests in our field Although with a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed These range from considerations of olfactory perception memory expertise and priming right the way through to receptor genetics These contributions from many leading experts in the field will surely shape much of the applied work linking olfaction to disease which is a further focus of this ebook In respect to health and disease the chapters on aging pregnancy depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary problems to

which the study of olfaction is now contributing A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives The ebook covers some particularly intriguing aspects of work in this area with empirical studies investigating dissociations between wanting and liking stress reduction in the elderly mother infant bonding and the emotions that different odourants can evoke This affective line of work is nicely complemented by empirical studies on expertise the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters reporting data using neuroimaging including a particular intriguing study looking at recognition of odours in mixtures Finally the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine I hope that readers of this e book will be struck as I have been in reading its various chapters how much olfaction affects our lives and how the study of this sense can enrich it References Bushdid C Magnasco M Vosshall L Keller A 2014 Humans can discriminate more than 1 trillion olfactory stimuli Science 343 1370 1372
