**Meaninglessness** M. A. Casey,2002-01-01 What would the world be like if we no longer needed meaning Australian

sociologist Michael Casey's revealing work charts the collapse of the metaphysical world and the innate human need for meaning. With the decline of Christianity and the demise of secular universalism in the west, the meaning and value of metaphysical culture has been replaced by an entirely new post metaphysical world. In *Meaninglessness*, Casey revisits the social theory of Nietzsche, Freud, and Rorty in order to conceive how this post metaphysical culture may take shape in the third millennium. Framing questions of enduring significance to contemporary social and political theory in a new methodological light, this work will appeal to scholars and general readers interested in sociology, post modernism, cultural studies, political theory, and philosophy.

*Agricultural Bioeconomy* Chetan Keswani, Cristina Possas, Emmanuel Koukios, Davide Viaggi, 2022-11-29 *Agricultural Bioeconomy: Innovation and Foresight in the Post COVID Era* presents recent advancements in biotechnology exploring the optimal utilization of technologies to provide rapid and impactful economic recovery and sustainable resources in a future that will bear the mark of COVID 19. Understanding that there is a necessary balance between risk and reward, this book provides a foundational hypothesis as well as operational direction for addressing the commercialization and regulatory issues in a bio based economy where agricultural output is at the core. By presenting adaptable practices to successfully establish and progress agri based global bioeconomies, the book features a new paradigm focused on technological foresight and response to future risks and disasters. Key considerations include assessing and managing the urban bioeconomy, climate change mitigation, biofuels, and bioenergy, GMOs, and employment generation. This book provides the solid next step toward future proofing global economies using a combination of agricultural technologies and economic goals. Professionals and advanced students focused on the production of renewable biological resources and their conversion into value added products, including food, feed, bio based products, and bioenergy, will find this book useful. Addresses recent issues emerging in agro based economies. Empowers utilization of biotechnology to address worldwide ecological issues. Presents adaptable risk management approaches to the adoption of socially and financially valuable agri based technologies.
