Systems Approach to the Design of Commercial Aircraft Scott Jackson, Ricardo Moraes dos Santos, 2020-09-01 While aviation fatalities have thankfully fallen dramatically in recent years the phenomena of complexity and cognitive bias have been shown to be factors in many accidents An understanding of these phenomena promises to bring the fatality rate even lower and a deeper understanding of commercial aircraft in the context of systems engineering will contribute to that trend Systems Approach to the Design of Commercial Aircraft describes commercial aircraft from an advanced systems point of view addressing complexity cybersecurity and systems architecting In addition it provides an explanation of systems engineering describes how systems engineering forms a framework for commercial aircraft covers how systems engineering and systems architecting relate to commercial aircraft addresses complexity and shows how humans fit into systems engineering and the importance for commercial aircraft It goes on to present how cybersecurity plays an important role in the mix and how human interface fits in The readership includes designers of aircraft manufacturers researchers systems engineers and students Scott Jackson is a fellow of the International Council on Systems Engineering INCOSE and the author of Systems Engineering for Commercial Aircraft 1997 and 2015 in English and Chinese Ricardo Moraes dos Santos is a senior systems engineer at EMBRAER S A and an INCOSE Brazil chapter director He works with Architecting process Corporate and is head of Cybersecurity and Safety STPA Applications at EMBRAER S A
