Teach Math Like This, Not Like That Matthew L. Beyranevand, 2017-05-24 Teaching mathematics is one of the most difficult and important jobs that anyone can do Mathematics is a critical part of education and an essential building block for problem solving skills that are needed in the real world However many students struggle to learn and understand mathematical concepts and educators need to do everything possible to help our students learn This book focuses on four areas necessary to be an impactful teacher of mathematics Planning Pedagogy Assessment and Relationships For each of the ideas presented in the book a brief introduction will be shared and then two different perspectives will be detailed with examples The first is Not like This which is often the traditional way of teaching mathematics or the less effective approach The second perspective is Teach Like This which is my recommended approach based upon research and my own experience as a teacher math coordinator and graduate instructor of math education

Mathematicians and Education Reform, 1989-1990 Naomi Fisher, Harvey Keynes, Philip Wagreich, 1991 Educational issues are receiving a great deal of attention in the mathematical sciences community as concern rises over the quality of instruction in the nation s schools colleges and universities Insuring a mathematically literate population and increasing the number of students pursuing careers in mathematics science and engineering are high on the list of priorities Mathematicians can make important contributions to the educational reform process The present volume is the second in the series Issues in Mathematics Education launched in 1990 by the Conference Board of the Mathematical Sciences and published by the AMS and the Mathematical Association of America The purpose of the series is to stimulate the flow of information among mathematical scientists education specialists and teachers about innovative efforts to revitalize mathematics education Compiled and edited by the directors of the Mathematicians and Education Reform MER Network this book contains papers by speakers and participants in MER workshops and special sessions over the last three years Like the first volume which also grew out of an MER workshop this book is organized into two sections Projects and Issues and Reactions providing a balance between descriptions of successful existing projects and more in depth discussion of problems and issues in mathematics education reform With contributions by some of the major leaders in this area today this book will likely be of interest to a broad segment of the mathematical sciences community
