Geography P November 2014:

Understanding Cultural Geography Jon Anderson, 2015-03-24 *Understanding Cultural Geography* Places and Traces offers a comprehensive introduction to perhaps the most exciting and challenging area of human geography. By focusing on the notion of place as a key means through which culture and identity is grounded, the book showcases the broad range of theories, methods and practices used within the discipline. This book not only introduces the reader to the rich and complex history of cultural geography but also the key terms on which the discipline is built. From these insights, the book approaches place as an ongoing composition of traces, highlighting the dynamic and ever-changing nature of the world around us. The second edition has been fully revised and updated to incorporate recent literature and up-to-date case studies. It also adopts a new seven-section structure and benefits from the addition of two new chapters: Place and Mobility and Place and Language. Through its broad coverage of issues such as age, race, scale, nature, capitalism and the body, the book provides valuable perspectives into the cultural relationships between people and place. Anderson gives critical insights into these important issues, helping us to understand and engage with the various places that make up our lives. *Understanding Cultural Geography* is an ideal text for students being introduced to the discipline through either undergraduate or postgraduate degree courses. The book outlines how the theoretical ideas, empirical foci and methodological techniques of cultural geography illuminate and make sense of the places we inhabit and contribute to. This is a timely update on a highly successful text that incorporates a vast foundation of knowledge; an invaluable book for lecturers and students.

Disability, Avoidance and the Academy David Bolt, Claire Penketh, 2017-07-14 Disability is a widespread phenomenon; indeed, a potentially universal one, as life expectancies rise. Within the academic world, it has relevance for all disciplines yet is often dismissed as a niche market or someone else's domain. This collection explores how academic avoidance of disability studies and disability theory is indicative of social prejudice and highlights conversely how the academy can and does engage with disability studies. This innovative book brings together work in the humanities and the social sciences and draws on the riches of cultural diversity to challenge institutional and disciplinary avoidance. Divided into three parts, the first looks at how educational institutions and systems implicitly uphold double standards which can result in negative experiences for staff and students who are disabled. The second part explores how disability studies informs and improves a number of academic disciplines from social work to performance arts. The final part shows how more diverse cultural engagement offers a way forward for the academy, demonstrating ways in which we can make more explicit the interdisciplinary significance of disability studies and by extension, disability theory, activism, experience and culture. *Disability, Avoidance and the Academy* Challenging Resistance will interest students and scholars of disability studies, education studies and cultural studies.

Vertical Stephen Graham, 2016-11-08 A revolutionary reimagining of the cities we live in: the air above us and what goes on in the earth beneath our feet. Today we live in a world that can no longer be read as a two-dimensional map but must now be understood

as a series of vertical strata that reach from the satellites that encircle our planet to the tunnels deep within the ground In Vertical Stephen Graham rewrites the city at every level how the geography of inequality politics and identity is determined in terms of above and below Starting at the edge of earth s atmosphere and in a series of riveting studies descending through each layer Graham explores the world of drones the city from the viewpoint of an aerial bomber the design of sidewalks and the hidden depths of underground bunkers He asks why was Dubai built to be seen from Google Earth How do the super rich in S o Paulo live in their penthouses far above the street Why do London billionaires build vast subterranean basements And how do the technology of elevators and subversive urban explorers shape life on the surface and subsurface of the earth Vertical will make you look at the world around you anew this is a revolution in understanding your place in the world

European Cinema and Television Ib Bondebjerg,Eva Novrup Redvall,Andrew Higson,2016-04-19 This book offers comparative studies of the production content distribution and reception of film and television drama in Europe The collection brings together scholars from the humanities and social sciences to focus on how new developments are shaped by national and European policies and practices and on the role of film and television in our everyday lives The chapters explore key trends in transnational European film and television fiction addressing issues of co production and collaboration and of how cultural products circulate across national borders The chapters investigate how watching film and television from neighbouring countries can be regarded as a special kind of cultural encounter with the possibility of facilitating reflections on national differences within Europe and negotiations of what characterizes a national or a European identity respectively

Geopolitics and Culture Sanna Turoma,Sigrid Kaasik-Krogerus,Saara Ratilainen,2025-02-15 Inspired by popular feminist subaltern and ecocritical geopolitics Geopolitics and Culture Narrating Eastern European and Eurasian Worlds presents new research of culture in the Eastern European context This volume highlights the symbolic production of power which although located outside political institutions engenders geopolitical boundaries and defines cultural margins Analyzing multilingual materials such as blockbuster films digital visuals blogs and discussion forums print fiction and TV series museum exhibitions and everyday cultural practice this book argues for the importance of studying the links between geopolitical narratives global and regional hierarchies and popular cultural production The contributors advance a decolonizing methodology which challenges the cultural and geopolitical hierarchies inside Eastern Europe and Eurasia while also casting a critical eye on the geopolitical hierarchies of global Anglophone media cultures

Edwards, Dorothy J. Dankel, 2016-02-26 A key goal of fisheries management is to regulate extractive pressure on a resource so as to ensure social economic and ecological sustainability This text provides an accessible entry point for students and professionals to management science as developed in fisheries in order to facilitate uptake of the latest ideas and methods Traditional management approaches have relied upon a stock assessment based on existing understanding of resource status and dynamics and a prediction of the likely future response to a static management proposal However all such predictions include an inherent degree of uncertainty and the last few decades have seen the emergence of an adaptive approach that uses feedback control to account for unknown future behaviour Feedback is achieved via a control rule which defines a relationship between perceived status of the resource and a management action Evaluations of such rules usually include computer simulation testing across a broad range of uncertainties so that an appropriate and robust rule can be selected by stakeholders and managers The book focuses on this approach which is usually referred to as Management Strategy Evaluation The book is enriched by case study examples from different parts of the world as well as insights into the theory and practice from those actively involved in the science of fisheries management **Routledge Handbook of the Sociology of Sport** Richard Giulianotti, 2015-07-24 The sociology of sport is a core discipline within the academic study of sport It helps us to understand what sport is and why it matters Sociological knowledge implicit or explicit therefore underpins scholarly enquiry into sport in every aspect The Routledge Handbook of the Sociology of Sport is a landmark publication that brings together the most important themes theories and issues within the sociology of sport tracing the contours of the discipline and surveying the state of the art Part One explores the main theories and analytical approaches that define contemporary sport sociology and introduces the most important methodological issues confronting researchers working in the social scientific study of sport Part Two examines the connections and divisions between sociology and cognate disciplines within sport studies including history anthropology economics leisure and tourism studies philosophy politics and psychology Part Three investigates how the most important social divisions within sport and in wider society are addressed in sport sociology including race gender class sexuality and disability Part Four explores a wide range of pressing contemporary issues associated with sport including sport and the body social problems associated with sport sport places and settings and the global aspects of sport Written by a team of leading international sport scholars including many of the most well known respected and innovative thinkers working in the discipline the Routledge Handbook of the Sociology of Sport is an essential reference for any student researcher or professional with an interest in sport *Origination* Andy Pike, 2015-06-02 *Origination* The Geographies of Brands and Branding offers innovative theoretical and conceptual frameworks relating to the ways that actors create meaning and value in commodity brands and branding through processes of geographical association Provides innovative conceptualization and

theorization to facilitate an understanding of the geographical dimensions of brands and branding Challenges current interpretations of brands as vehicles of homogenization in globalization Establishes the theoretical and conceptual foundations of a more geographically sensitive approach through rigorous empirical examination of the under researched geographical differentiation of commodity brands and branding Presents innovative new research and analysis of the socio spatial biographies of the Newcastle Brown Ale Burberry and Apple brands Forges strong new connections between political and cultural economy approaches within geography Provides a distinctive and incisive conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places Hope and Grief in the Anthropocene Lesley Head,2016-02-22 The Anthropocene is a volatile and potentially catastrophic age demanding new ways of thinking about relations between humans and the nonhuman world This book explores how responses to environmental challenges are hampered by a grief for a pristine and certain past rather than considering the scale of the necessary socioeconomic change for a future world Conceptualisations of human nature relations must recognise both human power and its embeddedness within material relations Hope is a risky and complex process of possibility that carries painful emotions it is something to be practised rather than felt As centralised governmental solutions regarding climate change appear insufficient intellectual and practical resources can be derived from everyday understandings and practices Empirical examples from rural and urban contexts and with diverse research participants indigenous communities climate scientists weed managers suburban householders help us to consider capacity vulnerability and hope in new ways **Environmental Information Systems: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2018-09-07 This three volume publication is an IGI Global Core Reference for 2019 as it provides over 75 chapters containing the latest research on information systems remote sensing and geographic information science that is utilized for the management of environmental data Bringing together the international perspectives of researchers in the U S Australia China Canada Italy and more this title is an ideal reference for engineers data scientists practitioners academicians and researchers interested solving conceptual methodological technical and managerial issues within Environmental Information Systems Environmental Information Systems Concepts Methodologies Tools and Applications is an innovative reference source containing the latest research on the use of information systems to track and organize environmental data for use in an overall environmental management system Highlighting a range of topics such as environmental analysis remote sensing and geographic information science this multi volume book is designed for engineers data scientists practitioners academicians and researchers interested in all aspects of environmental information systems Global Production Networks Neil M. Coe,Henry Wai-Chung Yeung,2015 Accelerating processes of economic globalization have fundamentally reshaped the organization of the global economy towards much greater integration and functional interdependence through cross border economic activity In this interconnected world system a new form of economic organization has emerged Global

Production Networks GPNs This brings together a wide array of economic actors most notably capitalist firms state institutions labour unions consumers and non government organizations in the transnational production of economic value National and sub national economic development in this highly interdependent global economy can no longer be conceived of and understood within the distinct territorial boundaries of individual countries and regions Instead global production networks are organizational platforms through which actors in these different national or regional economies compete and cooperate for a larger share of the creation transformation and capture of value through transnational economic activity They are also vehicles for transferring the value captured between different places This book ultimately aims to develop a theory of global production networks that explains economic development in the interconnected global economy While primarily theoretical in nature it is well grounded in cutting edge empirical work in the parallel and highly impactful strands of social science literature on the changing organization of the global economy relating to global commodity chains GCC global value chains GVC and global production networks GPN

Neighbourhood Policy and the Construction of the European External Borders Filippo Celata, Raffaella Coletti, 2015-06-11 This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries By bringing together the perspectives of critical geopolitics policy studies and border studies it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers Is the EU committed to promoting integration in a wider European space or is a fortress Europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure inclusion and exclusion cooperation and securitisation The European Neighbourhood Policy is a controversial strategy where regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border A specific focus is devoted to the diversity of geo strategies the EU is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players
