**Early Warning Systems and Targeted Interventions for Student Success in Online Courses** Glick, Danny, Cohen, Anat, Chang, Chi, 2020-06-26 Online learning has increasingly been viewed as a possible way to remove barriers associated with traditional face to face teaching such as overcrowded classrooms and shortage of certified teachers While online learning has been recognized as a possible approach to deliver more desirable learning outcomes close to half of online students drop out as a result of student related course related and out of school related factors e g poor self regulation ineffective teacher student student student and platform student interactions low household income Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason A well implemented early warning system therefore can help educators identify students at risk of dropping out and assign and monitor interventions to keep them on track for graduation Despite the popularity of early warning systems research on their

design and implementation is sparse Early Warning Systems and Targeted Interventions for Student Success in Online Courses is a cutting edge research publication that examines current theoretical frameworks research projects and empirical studies related to the design implementation and evaluation of early warning systems and targeted interventions and discusses their implications for policy and practice Moreover this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and therefore more actionable Highlighting a range of topics such as curriculum design game based learning and learning support it is ideal for academicians policymakers administrators researchers education professionals instructional designers data analysts and students

**The Yugoslav Example** Bettina Gruber,2014 The term Yugoslav Wars or often the Balkan conflict refers to a series of wars in the region of former Yugoslavia which were associated with the break up of that state The Yugoslav Wars resulted in an unimaginable number of dead injured and displaced people They also had a devastating impact on the economy and on the environment Most notably in some of the states which emerged from the conflict people still to this day cannot peacefully coexist with one another Beyond the affected region itself the military conflict also had significant implications for Europe and its member states It destroyed the illusion that Europe had overcome war Perhaps these recent wars have given Europe an impetus to draw lessons from them to find out what really needs to be done to build a peaceful Europe A particular characteristic of this publication is that it does not settle for a single precise analysis of the reasons for war and for post war conflicts Rather peace efforts and peace treaties are analyzed by focusing on their function of preventing conflicts or reducing their extent Emphasis is placed on the efforts of national actors as well as on those of actors in civil society to promote peace policies in the international sphere This collection of articles might for the first time clearly display the political challenges of peace in the context of the collapse of Yugoslavia and its subsequent wars It certainly seeks to illustrate what has been learned and what still needs to be learned for the future *Learning, Design,*
