

Photosynthesis

The plant takes in sunlight through its leaves and other green parts.

Carbon dioxide from the air enters the plant.

The plant makes oxygen that is then released into the air.

A chemical inside the plant called **chlorophyll** traps the Sun's energy.

Inside the chlorophyll are **chloroplasts** that combine everything and makes the food/sugars for the plant.

The food is then sent throughout the plant. Plants and animals are living things. Both need the food and energy to live. Animals get their energy from the plants and animals they eat. Plants, however, do not have a mouth and cannot eat like animals. The food-making process for plants is called photosynthesis. It might be a big word, but **photosynthesis** is used by plants to make their own food as well as produce oxygen.

Grade 3 Lesson Plans On Photosynthesis

Victor M. Corman

Grade 3 Lesson Plans On Photosynthesis:

Embracing the Melody of Phrase: An Emotional Symphony within **Grade 3 Lesson Plans On Photosynthesis**

In some sort of eaten by screens and the ceaseless chatter of instant conversation, the melodic beauty and psychological symphony developed by the written word frequently fade into the back ground, eclipsed by the relentless noise and distractions that permeate our lives. However, set within the pages of **Grade 3 Lesson Plans On Photosynthesis** a stunning fictional value full of organic emotions, lies an immersive symphony waiting to be embraced. Crafted by a masterful composer of language, this captivating masterpiece conducts viewers on a psychological journey, skillfully unraveling the concealed songs and profound impact resonating within each cautiously constructed phrase. Within the depths of the touching examination, we shall explore the book's main harmonies, analyze their enthralling publishing type, and surrender ourselves to the profound resonance that echoes in the depths of readers' souls.
