

Lab 6 - Nervous System: Special Senses

In today's lab you will investigate the behavior of the human nervous system and the special senses.

Scientific Method Connection: Observation of the functions of the human nervous system and special senses. Asking questions about the nature of the nervous system.

Activity 1: Touch Receptors

1. Locate your touch receptors

- a. Work with a partner and use a set of dividers to see if your partner can feel one point or two points at various places on their skin. If a person only feels one point it means that one receptor is sending impulses to their brain. Complete the table in the handout.

2. Next, go to the three containers of water on the counter.

- a. Put your right hand in the cold water and your left hand in the warm water until you no longer feel the temperature of the water (about 3-4 minutes)
- b. Remove your left hand from the warm water and place it into the room temp water. Have your partner record your results.
- c. Remove your right hand from the cold water and place it into the room temperature water. Have your partner record your results.

3. Answer the questions in your lab.
