Optimal Strategies in Sports Economics and Management Sergiy Butenko,Jaime Gil-Lafuente,Panos M.

Pardalos,2010-08-25 During the last century we have witnessed the birth and evolution of sport as an economic activity which has created jobs on the one hand but also problems of management on the other This process has not been immune from the parti lar characteristics associated with sport typically united here more than in other activities technique physical effort entertainment and passion And all this within a framework of ever increasing consumption of nancial resources It is not s prising therefore that commonly used economic models based on mechanistic approaches do not provide a viable solution to increasingly complex and incre ingly frequent problems Any attempt to apply such an approach in this technical economic and nancial context can only result in failure The high degree of subj tivity inherent in sporting activity requires new tools in which remodeled conc tual theoretical and technical elements should play an important role Complexity uncertainty and subjectivity are therefore basic to understand and deal with the phenomenon of sport The necessity of resorting to these elements was identi ed over a quarter of a century ago by a small group of professors and researchers at the University of Barcelona Together we started the rst postgraduate courses and organized se nars to alert sports centre managers as well as to make private and public organi tions aware of the increasing importance of a proper speci c management for sports organizations
