1. Your UK-based client comes to see you with a formula for a new drug. Which ONE of the following intellectual property rights would be most suitable to protect it?

- A. Database right.
- B. Copyright
- C. Patent**
- D. Design Right.

You are correct.

A formula for a new drug should be protected by way of a UK patent. This would give the company 20 years of protection against anyone who tried to create, sell, or import the drug. Effectively it gives a complete monopoly over the drug in the UK.

2. Your UK-based client comes to see you with a designer chair. Which ONE of the following MOST ACCURATELY states the intellectual property rights which would be likely to protect it?

- A. Patent only.
- B. Patent and Registered Design Right only.
- C. Registered Design Right only.
- D. Registered and Unregistered Design Right only.**

You are correct.

The unique shape of a chair would be protectable by both Unregistered and Registered Design Rights. It would have to be new and create a different overall impression from other chairs to be registrable, whereas it would only have to be original to gain Unregistered protection. Duration would be up to 15 years for Unregistered and up to 25 years for Registered.

3. Your UK-based client comes to see you with a list of customers. Which ONE of the following intellectual property rights would be most suitable to protect it?

- A. Database right.**
- B. Copyright.
- C. Patent.
- D. Design Right.

You are correct.

A list of customers could theoretically gain copyright protection, however it may have difficulty overcoming the requirement that intellectual effort was used to create it. A more likely right would be Database Right, which
